ONLINE HOSTING TEAM MEMBER

Our Mission

To create authentic, Christ-centered communities that love God wholeheartedly and reach out intentionally so that others experience new life in Jesus and a transforming life of discipleship.

The Win

- As part of our mission to reach out intentionally, the Online Hosting Team Member connects their online skill sets to North Bay by serving the church on Sundays, greeting and communicating with our online viewers.
- This role will support church staff, particularly the Office Admin and pastors.

The Work

- Logging on to Facebook, YouTube, and North Bay Community Church, with your personal account, 10 minutes before service starts.
- For Facebook and YouTube, search for North Bay Community Church and join the live feed. For North Bay Community Church, go to Media and join the live feed.
- Post a welcome message in each chat to let viewers know that you are happy they are joining and that you are the host of that service.
- Post a message for the notes link, and the connection link. (ie. Notes are available at https://notes.northbay.cc and Connect with us at https://northbaycommunity.church/connection) These must be separate comments in order for both links to work.
- If people interact or chat, like their comments and if appropriate respond with a kind word.
- If someone asks a question that you don't know the answer to, get their name and question and send it to the Office Admin. This can be as simple as taking a picture and texting it, or sending an email.
- If someone is being rude or disrespectful, text the Office Admin immediately or talk to Chris at the media station so that we can handle the situation from the North Bay account.
- After the 9:30 am service, you will need to refresh Facebook, YouTube, and North Bay's site and select the 11:00 am service before repeating these steps.
