

*nmttp- at the podium prior to giving his speech on Saturday.*

**DETROIT, Lincoln** - The issue on unemployment is among topics that was addressed by nmttp- at his rally here in Michigan on Saturday.

According to the published transcripts by nmttps team, the CPP-GOP presumptive Lincoln Gubernatorial Candidate discussed the projected unemployment rate and the estimated number of unemployed people in Lincoln until the end of this year.

It is presumed that in his next rally on Sunday, in Minnesota, the former AG will address the abuse of business licenses issued by local government authorities, at the county and city level, who sell and lease these licenses to illegal immigrants and on his strategy to stop the practice.

Transcript of the nmmts- unemployment policies:

nmmts-:

Thank you for having me Michigan!

It's great to be in the state which pioneered America's automobile industry. It's such a shame that in our current day and age, because of Democrat policies, many of the good, honest and hardworking people of Michigan are left unemployed.

My friends, because of this failed leadership style, the unemployment rate sits at 21%, that's almost one in every five able-working adults who are unemployed, roughly around eight million people in the state of Lincoln by the end of the year will have lost a job. Michigan itself has shy off ten million people, that's practically your entire able-working population out of work, but in the wider respect of our entire state.

Times are tough. We've got to face it and I plan on changing things.

Let's try and balance the state budget, instead of investing billions in creating new infrastructure, let's fix the state-wide roads we have, working with district governments to create a workforce to do so. I intend on making some investments in our already existing major highways, upgrading our roads, rails, car parking and airport systems and services. This'll need manpower and this manpower will come out from the unemployment pool.

That's right people, under my governance, I'll make sure that **you** are the state's investment.

Not only that, let's create a simpler system which helps people find jobs. None of that mumbo jumbo, too-many-procedure nonsense. Youth unemployment is one of the biggest issues in our state and we've got to make sure that our youth's not left idle, missing on the many thousands of job employment opportunities out there. Imagine a system where you'd live out in Wyoming, only to receive job opportunities in Illinois, Indiana. Tax-reliefs will come into play, with a projected tax relief for over 10 million workers and 5 million small businesses.

And for those who's got the opportunity and means to work, but don't simply because of a drug dependency, we aren't taking that as an excuse anymore. Under my administration, those who suffer from an addiction will be required to take available treatment. If refused, drug and alcohol will no longer be a legitimate excuse for missing a job interview or training session.

But let's not stop there. Under my administration, we'll try and lower the welfare dependency, and at the same time, create over 1.5 million new jobs. We will work to create better conditions to decrease the number of people on income support, and have a fraud and non-compliance crackdown. Policies will be developed which will help parents get out of welfare, with a better compliance system. We'll introduce a stronger relationship verification process to ensure that people only receive the payments that they should be receiving.

And what about our national guard? It's time that we gave more thought to these patriots of our state! My administration values your security and the order of our way of life. We'll increase national guard and law enforcement investments, slashing the dreaded B.279 - let's make sure that our police officers have the right tools to protect the community! We'll place more investments in cyber security capabilities, boosting our intelligence and security agencies, working alongside federal law enforcement, to investigate, monitor, arrest and prosecute criminals and extremists.

With that in mind, we've seen the results of local community policing. We'll put more training and investment in local communities, making sure that they have the right tools and knowledge to protect their communities from violent crime.

If you elect me as your next Governor, I will make it a point to work by the end of my term as governor, to slash the unemployment rate by half! This August, vote nmmts- and p17r! Vote purple, vote for change!
