

# How to Create a Direct Link for an MP3 File

View this document in [English](#)

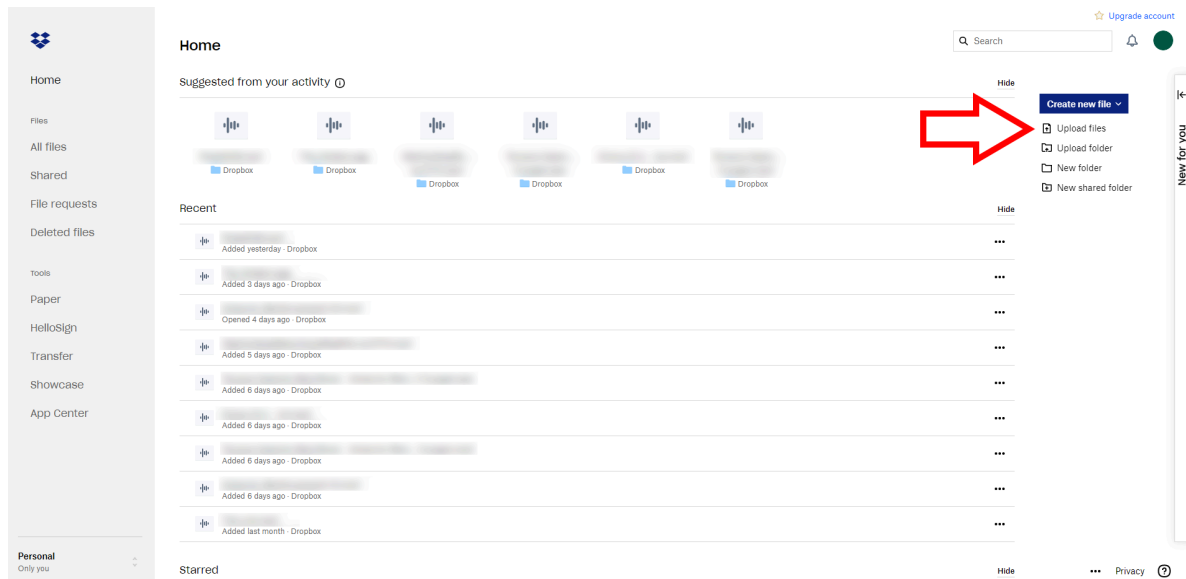

# Step 1)

Go to <https://dropbox.com> and create an account.

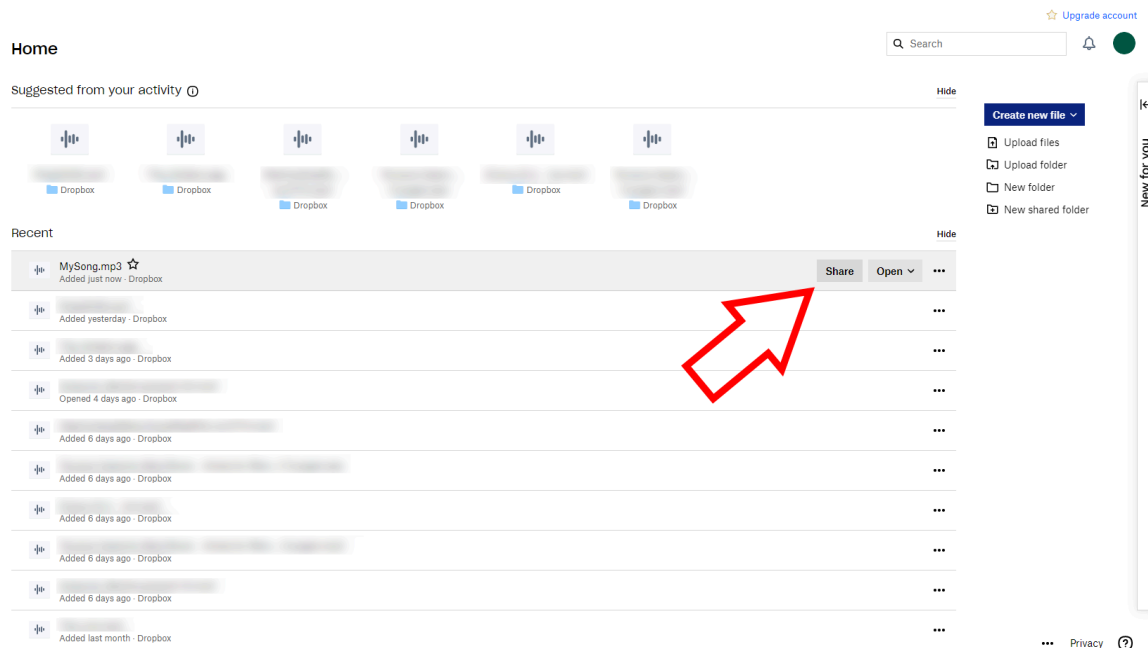

# Step 2)

Click “Upload files” or drag your mp3 file onto the window to upload it to your account.

## Step 3)

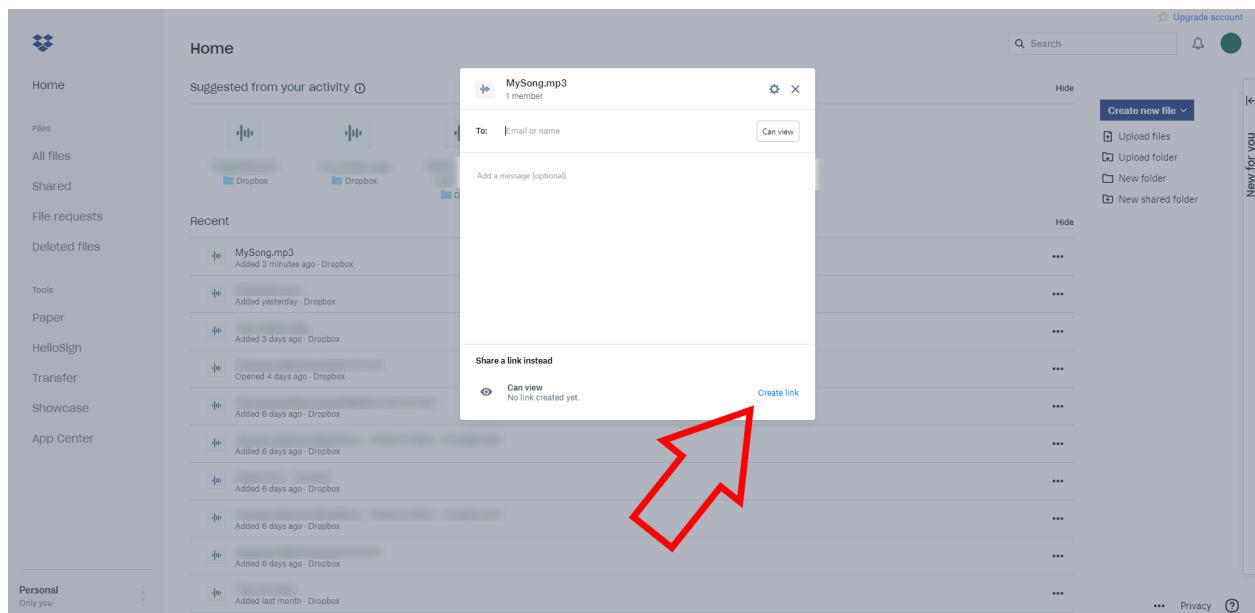

Click the “Share” button on your newly uploaded song.

## Step 4)

Click the “Create link” button, and then copy the shared link. It should look similar to:

*<https://www.dropbox.com/s/f91ka8khvove2i4m/MySong.mp3?dl=0>*

## Step 5)

Edit the link to turn it into a direct download link:

<https://www.dropbox.com/s/f91ka8khvov2i4m/MySong.mp3?dl=0>

Change the domain from `www.dropbox.com` to `dl.dropboxusercontent.com` (leave everything else the same)

It should now look like:

<https://dl.dropboxusercontent.com/s/f91ka8khvov2i4m/MySong.mp3?dl=0>

## Step 6)

That will be your completed direct link! Copy the dl.dropboxusercontent.com link and use it in game!
