Content Development

Teacher	Lesson	Grade	Date

- For each task in your lesson, place an "X" in the appropriate category.
  - **Informing:** introduction of a new skill/task.
  - **Extending:** tasks that increase or decrease the difficulty of a skill/task
  - **Refining:** tasks that focus on development of the qualitative aspects of performance.
  - **Application:** tasks which are applied either in self-testing or in a competitive experience

- Analysis
  - Calculate the total number of tasks in each category and divide by the total # of tasks to find the percentage. Ideally, each lesson will have varying tasks in each category.
  - Draw lines connecting each "X" to evaluate the pattern. There is no recommended order for content development.

Task	1	2	3	4	5	6	7	8	9	10	Total	%
