FEEDBACK

1. Well, this isn't just another subscription that cost \$100 per month for false promise
2. First, these guys share their real trades and experiences with a community. I found it very useful.
3. They formed their own portfolio and risk their own money.
4. They share everything - both their successes and failures - without trying to hide it.

How can StockThor help me?

We know well how difficult is to find interesting, profitable and low-risk investment ideas and how much time you need to spend for it. One wonders whether you can trust the sources you have found. Especially when the internet is full of advice websites and applications that offer you access to unreal upside signals for \$50 per month. We have spent weeks for research and define valuable and trusted sources for our own portfolio and propose you to join our community of friends
