Designing an AI-powered lesson plan

Instructions:

Participants work in groups to brainstorm and design a lesson plan that incorporates AI technology in a meaningful way. This activity could challenge them to think creatively about how AI can be used to enhance different subject areas, foster critical thinking, and promote collaboration among students.

Guiding questions:

1. How can AI technology be leveraged to enhance the learning experience for K-12 students, and what are some best practices for designing AI-powered lesson plans?
2. What ethical considerations should be taken into account when implementing AI-powered lesson plans in independent schools, and how can we ensure that the use of AI technology is fair, transparent, and accountable?
3. What are some of the potential challenges and limitations of using AI in K-12 education, and how can we mitigate these risks to ensure that AI-powered lesson plans are effective and equitable for all students?
