ABSTRACT

We welcome submissions in English. This document provides detailed guidelines for the "Short Abstract" format for the 2025 Conference on Engineering Sustainability and Civil Disaster Prevention. Authors may submit their abstracts in either Chinese or English. This sample file may be used as a template for preparing your submission. Authors must ensure that the submitted work is either their own or a collaborative creation, that it does not infringe upon the rights of others, and that it complies with all relevant laws and regulations of the Republic of China (Taiwan). If a submission does not adhere to the required formatting specifications—such as font type, size, layout, or page limits—the organizing committee reserves the right to directly modify the formatting, trim excess content from the end of the document to meet the page requirements, or, in severe cases, reject the submission without prior notice. Submissions that do not meet the conference's standards or requirements will also be rejected without further notification. Authors are responsible for checking the official conference website for any updates or additional instructions and must ensure that their final submission fully complies with all relevant guidelines.

Keywords: Nature of Article, Requirements on Submitted Articles

Paper Information:

Paper Subcategory	<input type="checkbox"/> Structures and Geotechnical Engineering	<input type="checkbox"/> Environmental and Ecological Sustainability	<input type="checkbox"/> Construction Materials
	<input type="checkbox"/> Smart Management and Disaster Prevention	<input type="checkbox"/> Other Topics	
Project Number	PB*****_***** (Mandatory for papers based on projects funded by NSTC)
