“At 60 miles an hour the loudest noise in this new Rolls-Royce comes from the electric clock”

What makes Rolls-Royce the best car in the world? “There is really no magic about it—it is merely patient attention to detail,” says an eminent Rolls-Royce engineer.

1. “At 60 miles an hour the loudest noise comes from the electric clock,” says the Technical Editor of our season. There must be some sort of magic about it—essentially.
2. Every Rolls-Royce engine is run for seven hours at full throttle before installation, and each car is road-tested for hundreds of miles over varying road surfaces.
3. The Rolls-Royce is designed as an owner-driven car. It is eighteen inches shorter than the largest domestic car.
4. The car has power steering, power brakes and automatic gearshift. It is very easy to drive and to park. No chauffeur required.
5. The finished car speaks a word to the loud world, being free-wheel. Here it is subjected to 99 separate shocks. For example, the engine has a sub-suspension to take for side-ways.
6. The Rolls-Royce is guaranteed for three years. With a safe network of dealers and parts-depots from Coast to Coast, service is no problem.
7. The Rolls-Royce radiator has never changed, except that when Sir Henry Royce died in 1933 the monogram RR was changed from red to black.
8. The coachwork is given five coats of primer paint, and hand rubbed between each coat, before one coat of finishing paint goes on.
9. By moving a switch on the steering column, you can adjust the shock absorbers to suit road conditions.
10. A picnic table, veneered in French walnut, slides out from under the dash. Two more swing out behind the front seats.
11. You can get such optional extras as an Espresso coffee-making machine, a dining machine, a hot, hot and cold water for washing, an electric cane or a telephone.
12. There are three separate systems of power brakes, one hydraulic and one mechanical. Damage to one system will not affect the other. The Rolls-Royce is a very safe car—and also a very steady car. It cruises serenely at eighty m.p.h. Its speed is over 100 m.p.h.
13. The Bentley is made by Rolls-Royce. Except for the radiators, they are identical motor cars, manufactured by the same engineers in the same works. People who feel different about driving a Rolls-Royce can buy a Bentley.
