Educational material on how to detect scam sites and submit them for takedown

Proponent: 13YWynHAu8F8uKZFbQwvPgJ67xizvo21HCEQU3Ke8z1XHoyT (frankywild)

Date: 09.09.2022

Proposed reward: \$1000

Additional rewards: Described in detail in the proposal

Proposed Curator reward: Described in detail in the proposal

Short description: A task of anti-scam bounty which aims to help new implementers on how to detect scam sites and submit them for takedown.

1. Purpose of this task

This proposal is created to help new implementers to learn by themselves how to detect scam sites and take them down.

This guide should make them capable to follow all the process without any help from the outside.

In this way, if in the future new implementers come, the old ones can save the time that takes teaching all this process.

2. Rewards breakdown

- Creation of the first version of the guide: \$1000
- **Additional rewards:** \$30-50 per new entry after that
- **Curator reward:** \$0

3. Future versions

In future versions, it can be added new information like new sites to get information about the registered domains, new ways of detecting scam sites or if there is any change on any step on this guide, it should be edited too.
