Grades K-12

Requesting Teacher – Nicole Detter-Smith HHS

Diigo is a multi-tool for personal knowledge management dramatically improve your workflow and productivity easy and intuitive, yet versatile and powerful.

Much of our information consumption and research, whether at home or at work, has shifted online. We are now spending a big part of our day working with online information - reading and researching related to travel, health, shopping, career, hobbies, news, online learning, smart investing, school papers, work projects, you name it.

Yet the workflow with information, from browsing, reading, researching, annotating, storing, . organizing, remembering, collaborating, sharing, to connecting dots into knowledge, is still largely ad-hoc and inefficient. Diigo is here to streamline the information workflow and dramatically improve your productivity. Our users include law firms, marketing agencies, consultants, recruiters, web designers, researchers, students, teachers ... -- basically anyone who consume lots of online information, either individually or as a team.

Red Flags

Upgrade options available **Approval for use is not an approval of funds**

First Name, Last Initial, Username, Password

Stores student web links and notes.

Fields Required: First Name, Last Initial, Username, Password

Notes: – Diigo is an awesome crowdsourcing and bookmarking tool and site. It does have classroom privacy setting that are favorable for schools. Teachers can sign up for a teacher upgrade which allows you to create your students. All SACS student accounts must be created by a teacher. There is an option to import. While creating students you have an option to completely disable personal profile info section. Please choose that option for all SACS students.
