Epson Interactive Projectors

Brightlink 685Wi

How to: Write on the screen - projected from a laptop or on a digital whiteboard.

- Pick up your Epson Pen and start drawing.
- Use the Easy Interactive Tools toolbar to choose annotation or whiteboard mode.

Epson Brightlink 685Wi Toolbar (Trant, Blumer, Nam, Shepherd, Spencer, Daniels, Yung, Price, Crehan, Bjork)

	Switch to built-in annotation mode
	Switch to built-in whiteboard mode
	Undo the last annotation
	Redo the last undo
	Switch to the computer interactive mode

Note: USB cable must be connected to switch to interactive mode (use pen as a mouse. See notes on next page.)

	Black pen (fine point on left, thick on right)
	Red pen (fine point on left, thick on right)
	Blue pen (fine point on left, thick on right)
	Eraser (thin width on left, thick on right)
	Clear all annotations
	Hide the toolbar after each annotation
	Close the toolbar

How to: Use the Epson Pen like a mouse to interact with a computer display (and write on the screen).

- Plug in the black USB cord that is on your media cart.
- Launch Easy Interactive Tools (EIT) software on your laptop.

There are 3 Modes

On the left side of the EIT toolbar you can choose between three modes - • Whiteboard • Annotation • Mouse

Troubleshooting and Notes

If you click the button on your pen and a small light doesn't turn on, the battery in the pen is dead.

You can customize the button on the pen in the settings. Click the **Toolbox icon** on the EIT toolbar and select **Settings**. You will see a drop down menu with different options in the **Right Click** section.

Projector settings - Menu/Settings/Easy Interactive/Pen Mode/ PC Interactive (shows only the EIT menu at the bottom of the screen)
