

2022-02-16 - golang-tools session

Previous session notes

- [2021-01-12 golang-tools session](#)

Details

16:30 UTC ([shared calendar](#))

Meet: <https://meet.google.com/xuq-tcoc-dkp>

Volunteer running the call: Rob Findley

Agenda

- **Start recording the session!**
- Matters arising from the previous call
- ide/editor/tools
 - General:
 - i. PSA: 1.18 with workspaces changes behavior of "go list -m"; [see issue](#)
 - Issues
 - i. [50955](#) x/tools/gopls: update editor instructions for go.work
 - Proposals/designs:
 - i. [51082](#) - go/doc: improve headings, lists, and links
 - ii.
- pkgsite
 - General - new/upcoming features
 - i.
 - Issues:
 - i. [51013](#) (mvdan) - "added in version" does not account for new packages
 - ii. [51185](#) (mvdan) - x/pkgsite has already dropped building on Go 1.17
 - Proposals/designs:
 - i.
- cmd/go
 - General:
 - i. <https://golang.org/cl/385995> workspaces removing -workfile flag
 - Issues
 - i. [golang/go#50603](#) - proposal: cmd/go: stamp the pseudo-version in builds generated by go build
 - ii. [50869](#) (mvdan) - GOCACHE permission errors may be hidden, affects go/packages
 - Proposals/designs:
 - i. [50969](#) - cmd/go: go test should always fuzz a bit even without -fuzz
- Generics
 - Generics update (rfindley)
- Misc
 - Idea (mvdan): github issues labeled "gopls" should avoid the "tools" label, otherwise the "tools" label is almost entirely just gopls content. github also supports logical ORs: label:Tools,gopls
 - Question (mvdan): even with the assumption that we're on track to release 1.18 in five weeks (RC1 plus four weeks), the merge window for 1.19 will be minuscule at 4-5 weeks tops. Do we expect to be able to do any feature work for it?
 - i. bcmills: I expect 1.19 to be mostly a patch release. (Maybe some features, but not many.)
 - ii.
- =====
- What are people working on going forward? Anything interesting to share?

-
- Volunteer for running the next session
