Abstract

The abstract should be self-contained and citation-free and should not exceed **200 words**. There are 4 components must contain within the abstract i.e. research aim, methods, brief results and conclusion.

Keywords: Up to 5-7 words

INTRODUCTION

This section should present the background of the research conducted, other studies that support (Spellman, 2013), this research is conducted which is new from the research conducted. The use of cited literature (Sutapa, Rosmawaty, & Samual, 2013), does not include literature that is not in the bibliography. It is not permitted to display figures and tables in this section (Bandjar, Sutapa, Rosmawaty, & Mahulau, 2014; Diop, Ben Talouba, Balland, & Mouhab, 2019; Sutapa et al., 2013)

METHODOLOGY

Materials and Instrumentals

This section must display the equipment (brand, specifications, and operating conditions) as well as the materials used (complete with the manufacturer).

Methods

This section must also be able to provide complete procedural information so that it can be carried out by other researchers who will be returning. All procedures that have been used must use international standard units and terms that are commonly used in scientific research.

Data Analysis

The equation used must be written centered with the numbering as in the following example:

$$E(F) = E(0) + \sum_i \left(\frac{\delta E(F)}{\delta F_i} \right)_0 F_i \tag{1}$$

RESULTS AND DISCUSSION

Subsection of Results

This section must display and explain the results of research obtained in a comprehensive manner. This section must be written systematically and can explain "What was done", "Why was done", and "How was the result". The picture obtained from the research results must be displayed as in Figure 1 and 2 (Aoyama, Aoki, & Sumita, 2021).

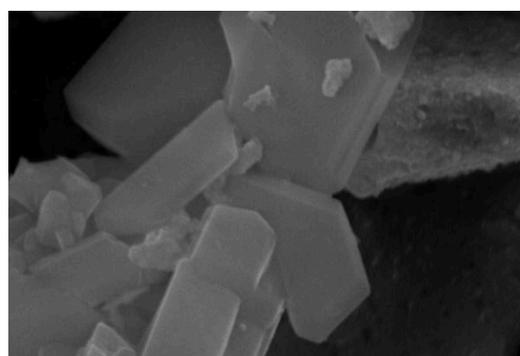

Figure 1. Title centered (Min. 300 dpi)

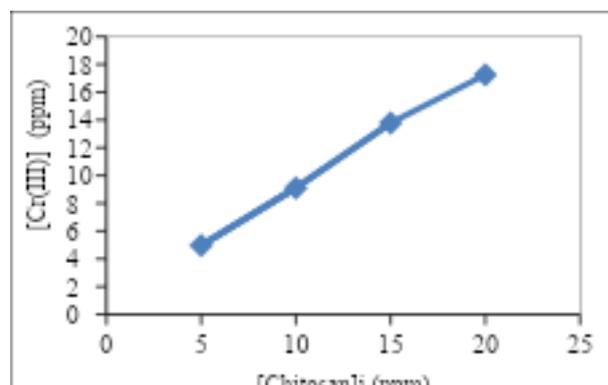

Figure 2. Title centered

The results obtained from the research carried out are shown as in Table 1.

Table 1. Caption of table

Methyl ester	Percentage (%)
methyl palmitoleic	0.04
methyl oleic	14.03
methyl palmitolenat	0.22

CONCLUSION

Conclusions must be presented briefly and clearly that describe the results of the research obtained. Make sure the conclusions match the research objectives. Conclusions are arranged in paragraphs rather than in numbering.

ACKNOWLEDGMENT

All Acknowledgments must be conveyed (if any) to the contributing parties, aid providers (complete with contract numbers), and other parties who participated in the preparation of this article.

Importance note:

Reference has minimal 15 articles. It is expected that 75% of references are to recent papers (no more than 10 years).

Manuscript with citation and reference not according to template will reject.

References should using references manager (zotero, endote, mendeley etc)

The references style: American Psychological Association, 6th Edition

The author for Research and Short communication should be more one
