

Source of Evidence: Professional Involvement Log (4D, 4E, 4F)

Name: Alyssa King

This Professional Involvement Log should be updated during each observational cycle and made available for review before each meeting with your university supervisor.

Due Dates: At least 3 new activities must be documented before each formal observation. The Supervisor will use these entries to score Domain 4.

Date	Activity	Description of Your Contributions/Involvement
3/5/2026	Faculty Meeting	By observing this meeting, I not only learned about the Kentucky Impact Survey, but I also got to witness the bi-play between different members of staff throughout the meeting which showed what a positive work environment would look like.
3/9/2026	Conservation Monitoring	I was involved by monitoring student behavior during the conservation meeting and ensuring that they were on task during the meeting.
3/19/2026	Mammoth Cave Field Trip Monitoring	I was involved by monitoring student behavior during the Mammoth Cave field trip and ensuring that they were on task during the field trip.
3/20/2026	Agricultural Presentations	I was involved by monitoring student behavior during the agricultural presentations and ensuring that they were on task during the presentations.
3/31/2026	GEMS Choir Presentation Monitoring	I was involved by monitoring student behavior during the GEMS performance and ensuring that they were on task during the performance.
4/14/2026	End Of Year 4th Grade Schedule Adjustments	I was involved by providing input on when certain activities and events should take place in relation to the end of the school year events, KSA testing, and iReady testing.
4/17/2026 part 1	Conservation Monitoring	I was involved by monitoring student behavior during the conservation meeting and ensuring that they were on task during the meeting.
4/17/2026 part 2	Testing Pep Rally Monitoring	I was involved by monitoring student behavior during the testing pep rally and ensuring that they were on task during the pep rally.
4/20/2026	Kids on The Block Presentation Monitoring	I was involved by monitoring student behavior during the Kids on The Block presentation and ensuring that they were on task during the presentation.

Reflection (4F)

Reflect on how the activities listed above provided **professional leadership** within the school, community, and/or education profession to improve student learning and well-being. Your discussion should include specific activities and their impact.

The activities collectively demonstrate professional leadership by having me contribute to a positive, well-managed learning environment and supporting both grade wide collaboration and a positive working environment. During the faculty meeting, I showed growth by observing staff interactions and gaining insight into what effective teamwork and a supportive culture can look like. Alongside this, I was able to learn about the Kentucky Impact Survey that the staff of my assigned school had to complete which tied into seeing a healthy work environment. Meanwhile, with all of the different event monitoring that I conducted throughout this placement, I was able to reinforce student accountability and safety by monitoring behavior and ensuring engagement during both school and community events. Lastly, with my participation in the 4th grade's end of the year scheduling, I helped align activities with testing schedules to minimize disruption and maximize student success, showing leadership through both coordination and planning.
