Criteria that must be met for a diagnosis of Narcissistic Personality Disorder (According to the Diagnostic and Statistical Manual of Mental Disorders volume five, or DSM 5):

1. Has a grandiose sense of self-importance (exaggerates achievements, expects to be lauded and applauded for minor things)
2. Is preoccupied with fantasies of unlimited success, power, brilliance, beauty or ideal love
3. Believes that he or she is "special" and cool
4. Requires excessive admiration
5. Has a sense of entitlement
6. Is interpersonally exploitative (takes advantage of others)
7. Lacks empathy
8. Is often envious of others or believes that others are envious of him or her
9. Shows arrogant, haughty behaviors or attitudes

Could be because of an original injury or could have been the cause of an original injury

TBI can increase symptoms that were already there

Not attributable to mania/hypomania or drugs.
