

Unusual Weapon Approval

Over time new styles and designs of weapons are developed outside of the parameters of the standard rules. We recognize this and do not desire to update the rulebook for each new weapon design released by a company.

A player in good combat standing (one who has not received a combat violation in the last 12 months) may petition to be permitted to use a weapon that does not fit within the rules (ie. a Flail or 8ft spear.) These weapons must be manufactured and not homemade.

When petitioning, the weapon will be reviewed, and the player tested on its use. Once approved, the weapon will be assigned a standard mechanic for its use that best matches the style of the weapon. Only the player may use this weapon and may only use that specific approved weapon (or a replacement of the same product if damaged). Each new weapon must be tested and approved on a case-by-case basis even if the player has already been approved for a weapon.

If a player has been found fighting unsafely with the unusual weapon, they will have the privilege revoked and may not attempt to reapply for at least 6 months.
