

Software QA Engineer

Adrian Martinez

Los Angeles, CA 90606

Cell: (562) 320-4317 | E-mail: Adrian.mart.360@gmail.com | LinkedIn

Summary

Experienced Software QA Engineer with hands-on experience in meticulously scrutinizing diverse projects to guarantee superior quality results. Proficient in testing both mobile platforms (iOS, Android) and web applications (Windows, macOS). Expertise includes conducting thorough functional, UI, smoke, and regression testing amidst dynamically changing requirements. Well-versed in the Software Development Life Cycle (SDLC) and adept in Software Testing Methodology. Demonstrates effective communication skills, engaging seamlessly with developers and product managers to discuss the present condition of software and propose enhancements. US Citizen

Professional Experience

Software QA Engineer | Talent Now, Los Angeles, CA

May 2023 – Present

- Monitoring product/software quality throughout all stages of development in an Agile environment
- Developing and executing test cases and test suites for various functionalities according to specified requirements
- Conducting functional, UI, smoke, and regression testing at every stage of the SDLC
- Executing manual testing for Web and Mobile applications, including iOS, Android, and Web applications using UNIX, XCode, ADB, and Android Studio
- Performing cross-browser testing on Google Chrome, Firefox, and Safari
- Identifies issues during test execution, troubleshoots effectively, and reports findings in Jira
- Collaborates with Product Managers and developers to resolve technical issues, ensuring compliance and enhancing team collaboration, achieving a 15% increase in sprint efficiency
- Conducting testing, including creating collections and running different calls and responses using Postman
- Creating test data through SQL, and writing SQL queries for back-end testing
