

Clinical Pharmacists – EXAMPLE Recruitment Pack

Recruiting Clinical Pharmacists

This pack contains an example job description, person specification and job advert for a Clinical Pharmacist. These resources align to the requirements set out in the Network Contract DES and are intended to be helpful for PCNs as they recruit to the Additional Roles Reimbursement Scheme. They are based on the role outline included in section B of the Network Contract DES, which can be found [here](#) and incorporate wider responsibilities that Pharmacy Technicians may undertake.

However, they are intended as helpful resources only: **they are not mandatory for use and PCNs should create their own versions of each resource to align to their individual needs.**

Clinical Pharmacists – EXAMPLE Recruitment Pack

EXAMPLE Job description

Job Title: Clinical Pharmacist

Responsible to: To be determined by the PCN

Accountable to: To be determined by the PCN

Hours of work: WTE is defined as 37.5 hours in line with Agenda for Change (AfC) terms, but this may vary for non-AfC posts.

Salary: To be determine by the PCN [*note: the role outline and reimbursement is based on indicative AfC Band 7*]

Job Scope

The post holder is a pharmacist, who acts within their professional boundaries, supporting and working alongside a team of pharmacists in general practice. In this role they will be supported by a senior clinical pharmacist who will develop, manage and mentor them.

The post holder will work as part of a multi-disciplinary team in a patient-facing role. The post holder will take responsibility for areas of chronic disease management within the practice and undertake clinical medication reviews to proactively manage patients with complex polypharmacy.

The post holder will provide primary support to general practice staff with regards to prescription and medication queries. They will help support the repeat prescription system, deal with acute prescription requests, and medicines reconciliation on transfer of care and systems for safer prescribing, providing expertise in clinical medicines advice while addressing both public and social care needs of patient in the GP practice (s).

The post holder will provide clinical leadership on medicines optimisation and quality improvement and manage some aspects of the quality and outcomes framework and enhanced services.

The post holder will ensure that the practice integrates with community and hospital pharmacy to help utilise skill mix, improve patient outcomes, ensure better access to healthcare and help manage workload. The role is pivotal to improving the quality of care and operational efficiencies, so requires motivation and passion to deliver an excellent service within general practice. The post holder will be supported to develop their role to become a nonmedical prescriber.

Clinical Pharmacists – EXAMPLE Recruitment Pack

Key duties and responsibilities

Patient facing Long –term condition clinics

See (where appropriate) patients with single or multiple medical problems where medicine optimisation is required (e.g. COPD, asthma).
Review the on-going need for each medicine, a review of monitoring needs and an opportunity to support patients with their medicines taking ensuring they get the best use of their medicines (i.e. medicines optimisation).
Make appropriate recommendations to Senior Pharmacists or GPs for medicine improvement.

Patient facing Clinical Medication Review

Undertake clinical medication reviews with patients and produce recommendations for senior clinical pharmacist, nurses and/or GP on prescribing and monitoring.

Patient facing care home medication reviews

Undertake clinical medication reviews with patients and produce recommendations for the senior clinical pharmacist, nurses or GPs on prescribing and monitoring. Work with care home staff to improve safety of medicines ordering and administration.

Patient facing domiciliary clinical medication review

Undertake clinical medication reviews with patients and produce recommendations for the senior clinical pharmacists, nurses and GPs on prescribing and monitoring. Attend and refer patients to multidisciplinary case conferences.

Management of common/minor/self limiting ailments

Managing caseload of patients with common/minor/self-limiting ailments while working within a scope of practice and limits of competence.
Signposting to community pharmacy and referring to GPs or other healthcare professionals where appropriate

Patient facing medicines support

Provide patient facing clinics for those with questions, queries and concerns about their medicines in the practice

Telephone medicines support

Provide a telephone help line for patients with questions, queries and concerns about their medicines.

Clinical Pharmacists – EXAMPLE Recruitment Pack

Medicine information to practice staff and patients

Answers relevant medicine-related enquiries from GPs, other practice staff, other healthcare teams (e.g. community pharmacy) and patients with queries about medicines.

Suggesting and recommending solutions.

Providing follow up for patients to monitor the effect of any changes

Unplanned hospital admissions

Review the use of medicines most commonly associated with unplanned hospital admissions and readmissions through audit and individual patient reviews.

Put in place changes to reduce the prescribing of these medicines to high-risk patient groups.

Management of medicines at discharge from hospital

To reconcile medicines following discharge from hospitals, intermediate care and into care homes, including identifying and rectifying unexplained changes and working with patients and community pharmacists to ensure patients receive the medicines they need post discharge.

Set up and manage systems to ensure continuity of medicines supply to high-risk groups of patients (e.g. those with medicine compliance aids or those in care homes).

Signposting

Ensure that patients are referred to the appropriate healthcare professional for the appropriate level of care within an appropriate period of time e.g. pathology results, common/minor ailments, acute conditions, long term condition reviews etc.

Repeat prescribing

Produce and implement a practice repeat prescribing policy.

Manage the repeat prescribing reauthorisation process by reviewing patient requests for repeat prescriptions and reviewing medicines reaching review dates and flagging up those needing a review.

Ensure patients have appropriate monitoring tests in place when required.

Risk stratification

Identification of cohorts of patients at high risk of harm from medicines through pre-prepared practice computer searches. This might include risks that are patient related, medicine related, or both.

Service development

Contribute pharmaceutical advice for the development and implementation of new services that have medicinal components (e.g. advice on treatment pathways and patient information leaflets).

Clinical Pharmacists – EXAMPLE Recruitment Pack

Information management

Analyse, interpret and present medicines data to highlight issues and risks to support decision making.

Medicines quality improvement

Undertake clinical audits of prescribing in areas directed by the GPs, feedback the results and implement changes in conjunction with the practice team.

Medicines safety

Implement changes to medicines that result from MHRA alerts, product withdrawal and other local and national guidance.

Implementation of local and national guidelines and formulary recommendations

Monitor practice prescribing against the local health economy's RAG list and make recommendations to GPs for medicines that should be prescribed by hospital doctors (red drugs) or subject to shared care (amber drugs).

Assist practices in seeing and maintaining a practice formulary that is hosted on the practice's computer system.

Auditing practice's compliance against NICE technology assessment guidance.

Provide newsletters or bulletins on important prescribing messages.

Education and Training

Provide education and training to primary healthcare team on therapeutics and medicines optimisation.
