Part Four - Wartime Ends

The Master reveals his ultimate plan; to end the Time War once and for all. Not by creating a hybrid creature of rage, not by using the Anti-Genesis codes or anything like that. But by using a weapon known as the Heavenly Paradigm; a device that can change timelines to give someone or something the best possible outcome. Everyone wins. But he needs Cole to do it...

- **The Heavenly Paradigm**

To the surprise of no one except the Master, the Heavenly Paradigm backfires. A device that makes everyone win also means that the Daleks win most of their conquests as well. The result is the Time War genuinely becoming worse than it was. The tipping point being the Master witnessing the Dalek Emperor taking control of the Cruciform. Something that wouldn't have happened if the Master didn't interfere. In fear, the Master runs to the end of the universe and uses the Chameleon Arch.
