

Many developers struggle to make their applications look like they want them to. So I spent 2 years crafting a UI/UX design course specifically for developers.

Enhance UI will teach you everything you need to know about UI/UX to start designing beautiful apps in a weekend or two. NO prior experience required!

- 10 hours of video lessons.
- E-book in both dark and light versions.
- Discord community of developers & designers.
- Exercises and workshops.
- [project, if applicable]
- And more...

You'll learn:

- Color theory
- Typography
- Component design
- Visual hierarchy
- Design processes
