

Here's a summary of all the manhole cover designs included in [this map](#). Note that in some instances there are multiple variations of some of these present in the map but the central element that makes it unique from other cities (usually in the middle if the design is kind of generic) will be the same on a variety of different designs.

Apologies, some of the picture quality is a bit scuffed because they're just what I saved for my personal reference before I decided to make this document but they're good enough to differentiate. Recommended to uncheck "Show print layout" in the view menu for the intended viewing experience.

There's also a clickable map version here if you prefer:
