Email purpose - Get them to buy the low-ticket product called The Ultimate Guide To Trial Reels. Designed to help them grow their followers within a few months.

Prospect - Instagram Coach

SL - 4 months = 16k followers

SL- Here's how I got from 800 → 16k followers

SL - 16k followers within 4 months?

PV - Here's how I did it

SL - The secret to 4k followers every month?

PV - I will finally reveal it...

A while back, when I was stuck at just 800 followers...

Something unexpected happened, %FIRSTNAME%.

The moment I saw it, I literally froze.

I just stared at my screen... completely confused.

And I had no idea that this tiny moment was about to flip my entire growth upside down.

For weeks,

I'd been posting nonstop.

Refreshing my feed over and over.

Checking my posts for the tenth time.

Yet Nothing.

No likes.

No saves.

No shares.

No reach.

Just silence.

And every day, the same questions kept eating at me:

“Is this even for me?”

“Will I ever grow past this?”

“Should I just get a mentor?”

I was frustrated! And sooo close to quitting.

Then, a few days later, something weird happened.

I uploaded a simple Reel.

No fancy edits.

No clever idea.

Just a basic post.

Within an hour... my phone wouldn't stop buzzing.

I thought it glitched.

Notifications everywhere.

My account was blowing up, and I had *no idea why*.

Without knowing, I accidentally tapped into one tiny part of the Instagram algorithm I'd been ignoring all along.

That one small shift changed everything.

I was excited and wanted more!

So I started testing...

Different hooks, lengths, angles, anything I could experiment with.

And slowly... a clear pattern appeared. A system was created.

Weeks later, my growth hit even harder.

And in just 4 months, I exploded from 800 → 16,000 followers.

All from one simple, repeatable system, ANYONE can use, even if you're starting from ZERO.

So if...

You're posting but nothing's happening...

You feel invisible on Instagram...

You're tired of guessing...

Reply **“Try”** and I'll send you the blueprint everyone else wishes they had,

And skip the years of painful trial and error. Get the shortcut I wish someone had handed me.
(I'm jealous 😭 If only I could go back in time...)

Talk soon,

Georgia
