1 INTRODUCTION

Your paper will be part of the conference proceedings; therefore, we ask that authors follow the guidelines explained in this example, in order to achieve the highest quality possible. Be advised that papers in a technically unsuitable form will be returned for retyping. After returned the manuscript must be appropriately modified.

Margins, column widths, line spacing, and type styles are built-in. Some components, such as multi-levelled equations, graphics, and tables are not prescribed, although the various table text styles are provided. The formatter will need to create these components, incorporating the applicable criteria that follow.

2 MANUSCRIPT PREPARATION

We strongly encourage authors to use this document for the preparation of the camera-ready. Please follow the instructions closely in order to make the volume look as uniform as possible.

Do not add any text to the headers (do not set running heads) and footers, not even page numbers, because text will be added electronically.

For a best viewing experience the used font must be Times New Roman, on a Macintosh use the font named times, except on special occasions, such as program code (Section 2.3.7).

Example column 1	Example column 2
Example text 1	Example text 2

Please note that the word “Table” is spelled out.

2.3.5 Figures

Please produce your figures electronically, and integrate them into your document.

Check that in line drawings, lines are not interrupted and have a constant width. Grids and details within the figures must be clearly readable and may not be written one on top of the other.

We suggest that you use a text box to insert a graphic (which is ideally a 300-dpi resolution TIFF or EPS file with all fonts embedded) because this method is somewhat more stable than directly inserting a picture.

Figures must appear inside the designated margins or that may span the two columns.

Figures in two columns must be positioned at the top or bottom of the page within the given margins. It is advisable the use of text boxes in this case.

Please do not use indentation and set the figure layout to in line with text.

Figures should be properly numbered, centered and should always have a caption positioned under it. Captions with one line should be centered and if it

has more than one line should be set to justified. The font size to use is 9-point. No bold or italic font style should be used. Spacing before and after should be of 6-point and 12-point, respectively.

The final sentence of a caption must end with a period.

Figure 1: This caption has one line so it is centered.

Figure 2: This caption has more than one line so it has to be set to justify.

Please note that the word “Figure” is spelled out. If your figure has two parts, include the labels “(a)” and “(b)” as part of the artwork. Please verify that the figures and tables you mention in the text actually exist.

2.3.6 Equations

The equations are an exception to the prescribed specifications of this template. You will need to determine whether or not your equation should be typed using either the Times New Roman or the Symbol font (please no other font). To create multileveled equations, it may be necessary to treat the equation as a graphic and insert it into the text after your paper is styled.

Italicize Roman symbols for quantities and variables, but not Greek symbols. Use a long dash rather than a hyphen for a minus sign. Punctuate equations with commas or periods when they are part of a sentence, as in

$a \cdot b$ $\bullet$ $\blacksquare$ $\square$

For complicated equations please use MathType Word extension.

Note that the equation is centered using a center tab stop. Be sure that the symbols in your equation have been defined before or immediately following the equation. Use “(1),” not “Eq. (1)” or “equation (1),” except at the beginning of a sentence: “Equation (1) is ...”

2.3.7 List

The following no numbered list style:

- 1;
- 2;

- 3.
or numbered list style:
- 1) 1;
- 2) 2;
- 3) 3.
- If use multilevel list:
- A) 1 level;
- 1) 2 level;
- 3 level

2.3.8 Program Code

Program listing or program commands in text should be set in typewriter form such as Courier New.

Example of a Computer Program in Pascal:

```
begin
  Writeln('Hello World!!!');
End.
```

The text must be aligned to the left with the linespace set to single and in 9-point type.

2.3.9 Reference Text and Citations

Papers must include a minimum of 10 references.

Try to exclude links to online resources and national non-translated publications. At least the half of the references must be published within the last 5-7 years are included in the WoS and SCOPUS provided DOI number. Authors are permitted to include citations to their own work in their paper, but these self-citations should not exceed 10% of the total references used in the paper. The template will number citations consecutively within brackets [1] (**IEEE style**). The sentence punctuation follows the bracket [2]. Refer simply to the reference number, as in [3] - do not use "Ref. [3]" or "reference [3]" except at the beginning of a sentence: "Reference [3] was the first ..."

If you use automated citation systems such as Zotero (<https://www.zotero.org>) or Mendeley (<https://www.mendeley.com/>), please use IEEE citation style and full names of Journals.

Number footnotes separately in superscripts. Place the actual footnote at the bottom of the column in which it was cited. Do not put footnotes in the reference list. Use letters for table footnotes.

Unless there are six authors or more give all authors' names; do not use "et al.". Papers that have not been published, even if they have been submitted for publication, should be cited as "unpublished" [4]. Papers that have been accepted for publication should be cited as "in press" [5]. Capitalize only the

first word in a paper title, except for proper nouns and element symbols.

For papers published in translation journals, please give the English citation [6].

Unless there are six authors or more give all authors' names; do not use "et al.".

3 CONCLUSIONS

We hope you find the information in this template useful in the preparation of your submission.

ACKNOWLEDGMENTS

If any, should be placed before the references section without numbering.

The preferred spelling of the word "acknowledgment" in America is without an "e" after the "g." Avoid the stilted expression "one of us (R. B. G.) thanks ...". Instead, try "R. B. G. thanks...". Put sponsor acknowledgments in the unnumbered footnote on the first page.
