SL: WHY HAVING A LOW BUDGET CAN COST YOU MORE

So look yes i know what you wondering how is having a low budget going to cost me more?

Why..?

Well i thought it was going to save me a lot of money being on a extremely low budget

So when home improvement companies started increasing their price rapidly

I had thought to myself

Why not get a really cheap home improvement by some other company

So then I did...

Well it backfired completely :(

The tiles were not fit properly

There was also safety hazards

There was project delays

It was a hellish and stressful time

So i decided to find the right people to do the home improvement AGAIN

This meant i had to spend more

Well This turned out to be a huge learning lesson from me

After several calls to companies

Tirelessly finding the right ones

I had learnt something

Today i have found the best home improvement companies THAT do the work well

Well your probably wondering how ?

For Starters i did not go on a low budget

I had instead done the total opposite and went on a decent budget to get my home improved

So how did i do it

Well first i did some research

The rest is history
