

(Considering the amount of attention the book received from CUP's copy-editor and from me, it's surprising there should be so many surviving errors, and I don't doubt that more will come to light. At the end of this document is a section on [Afterthoughts](#)-- unresolved queries which might turn into major or minor errors once they are resolved, plus my own critical reflections on what appear to me to be weaknesses in my own argument or its exposition, or references to secondary literature which has come to my attention since I finished the book, or which I knew about already but decided, I now think wrongly, not to cite. HJH 19 Sept. 2000)

### **MAJOR ERRORS-- i.e. typos etc. affecting meaning**

- BLURB and Short Bio: *The Right to Manage* was 1982, not 1992. Their mistake, but I didn't spot it. I'd much rather it was only eight years between books, not eighteen, but such is life.
- p.22? but *which* had
