A R T I C L E I N F O	ABSTRACT (9 PT)

Keywords:

First keyword;
Second keyword;
Third keyword;
Fourth keyword;
Fifth keyword;
Alfabet.

A well-prepared abstract enables the reader to identify the basic content of a document quickly and accurately, to determine its relevance to their interests, and thus to decide whether to read the document in its entirety. The Abstract should be informative and completely self-explanatory, provide a clear statement of the problem, the proposed approach or solution, and point out major findings and conclusions. The Abstract should be 150 to 250 words in length. The abstract should be written in the past tense. Standard nomenclature should be used and abbreviations should be avoided. No literature should be cited. The keyword list provides the opportunity to add keywords, used by the indexing and abstracting services, in addition to those already present in the title. Judicious use of keywords may increase the ease with which interested parties can locate our article (9 pt).

1.   INTRODUCTION (10 PT)

The main text format consists of a flat left-right columns on A4 paper. The margin text from the left are 3 cm and top are 5 cm, right and bottom are 2,5 cm. The manuscript is written in Microsoft Word, single space, **Bookman Old Style** 10pt and maximum 12 pages, which can be downloaded at the website: *https://jurnalfaktarbiyah.iainkediri.ac.id /index.php/joiem/*

A title of article should be the fewest possible words that accurately describe the content of the paper. Indexing and abstracting services depend on the accuracy of the title, extracting from it keywords useful in cross-referencing and computer searching. An improperly titled paper may never reach the audience for which it was intended, so be specific (Stewart, 2021).

The Introduction should provide a clear background, a clear statement of the problem, the relevant literature on the subject, the proposed approach or solution, and the new value of research which it is innovation (van der Giesen et al., 2020). It should be understandable to colleagues from a broad range of scientific disciplines. Organization

and citation of the bibliography are made in apa style in sign (Cranford, 2020) and so on. The terms in foreign languages are written italic (italic). The text should be divided into sections, each with a separate heading and numbered consecutively. The section/subsection headings should be typed on a separate line, e.g., **1. Introduction** (Saragih & Novimariono, 2020). Authors are suggested to present their articles in the section structure: **Introduction-Research Method-Results and Discussion-Conclusion**. Literature review that has been done author used in the chapter "Introduction" to explain the difference of the manuscript with other papers, that it is innovative, it are used in the chapter "Research Method" to describe the step of research and used in the chapter "Results and Discussion" to support the analysis of the results (Cranford, 2020). If the manuscript was written really have high originality, which proposed a new method or algorithm, the additional chapter after the "Introduction" chapter and before the "Research Method" chapter can be added to explain briefly the theory and/or the proposed method/algorithm (Shu et al., 2020).

For ***review literature articles*** use the following structures**: Introduction - Background of the study-Methods -Results -Conclusion -Limitations and future works-References**

2. RESEARCH METHOD (10 PT)

Explaining research chronological, including research design, research procedure (in the form of algorithms, Pseudocode or other), how to test and data acquisition (Cronje, 2020). The description of the course of research should be supported references, so the explanation can be accepted scientifically (Fryer & Dinsmore, 2020).

Tables and Figures are presented center, as shown in Table 1 and Figure 1, and cited in the manuscript before appeared.
Table 1**.** The performance of ... (9pt)

Symbol	Quantity	Conversion from Gaussian and CGS EMU to SI a
Φ	magnetic flux	1 Mx → 10−8 Wb = 10−8 V·s
B	Magneticflux density, magnetic induction	1 G → 10−4 T = 10−4 Wb/m2
H	magnetic field strength	1 Oe → 103/(4π) A/m
m	magnetic moment	1 erg/G = 1 emu → 10−3 A·m2 = 10−3 J/T
M	magnetization	1 erg/(G·cm3) = 1 emu/cm3 → 103 A/m
j	magnetic dipole moment	1 erg/G = 1 emu → 4π× 10−10 Wb·m
J	magnetic polarization	1 erg/(G·cm3) = 1 emu/cm3→ 4π× 10−4 T
Variable	Speed (rpm)	Power (kW)
x	10	8.6
y	15	12.4
z	20	15.3

Graphic contents are placed symmetrically on the page and there is one blank single space line between the graphic content and the paragpraphs. A graphic content is placed immediately after it is referred to in the body of the text and is numbered in Arabic numerals. Caption for the graphic content is written below it and there is one blank single space line between it and the graphic content. The caption is written in font size 8, and placed as in the example. Between the graphic content with the body of the text there are one blank single space lines. If the graphic content will be refered in the paragraph in brackets, please use no capital word, for example Figure 1.

All tables and figures will be processed as images. However, we cannot extract the tables and figures embedded in your document. (The figures and tables you insert in your document are only to help you gauge the size of your paper, for the convenience of the referees, and to make it easy for you to distribute preprints.) Therefore, submit, on separate sheets of paper, enlarged versions of the tables and figures that appear in your document. These are the images that we will scan and publish with your paper.

Figure 1. Effects of selecting different switching under dynamic condition (9pt)

The reaction or mathematical equation should be positioned symmetrically on the column, marked by sequential numbers written on the right corner within brackets. If the writting of equation takes more than one line, numbers should be written on the last line. Letters used as mathematical symbols in the text should be written in italics such as x. Equations in the text should be referred to as abbreviations, for example equation(1) or persamaan(2) in Bahasa Indonesia. Make sure the equation is made with equation function (in M.S. Word) or using LaTex equation form (definitely we do not accept equation put as a picture).

$$A = \sum \sum_{ij} x_{y^2} \pi r^2 \qquad\qquad (1)$$

(one blank single space line, 9 pt)

Programming code must be made in the text box and referenced as an image. Programming code contents are placed symmetrically on the page and there is one blank single space line between the paragpraphs. Code program in the text box written by using Consolas 8 pt in single space. A programming code content is placed immediately after it is referred to in the body of the text. Caption for the code program content is written below it and there is one blank single space line between it and the code program. The caption is written in font size 9, and placed as in the example. Between the code program with the body of the text there are one blank single space lines.

3. RESULTS AND DISCUSSIONS (10 PT)

In this section, it is explained the results of research and at the same time is given the comprehensive discussion. Results can be presented in figures, graphs, tables and others that make the reader understand easily (Grieshaber, 2020). The discussion can be made in several sub-chapters. In the discussion you must outline the Research GAP with previous research, this is the scientific contribution of your research.

4. CONCLUSION (10 PT)

Provide a statement that what is expected, as stated in the "Introduction" chapter can ultimately result in "Results and Discussion" chapter, so there is compatibility. Moreover, it can also be added the prospect of the development of research results and application prospects of further studies into the next (based on result and discussion). Conclusions avoid repeating the results of the research, but you draw conclusions from your findings in the research so in the previous section the discussion is very necessary to describe well and clearly so that you can easily draw conclusions.

ACKNOWLEDGEMENTS (10 PT)

REFERENCES (9 PT)

The main references are international journals and proceedings. All references should be to the most pertinent, up-to-date sources and the minimum of references are 25. References are written in APA style. Please use a consistent format for references – see examples below (9 pt), References must include a DOI for articles that have:
