CORNER

November Learning Blade Corner

November 8th is National STEM Day!
November 8th is **National STEM Day**, celebrating the crucial role that science, technology, engineering, and mathematics play in our lives and future! From developing life-saving technologies to protecting our environment, STEM professionals are solving real-world challenges, and Learning Blade can help your students discover and explore the careers that make it possible.
With engaging missions like **Dolphin Rescue, Rescue Robot, and Energy Sources**, your students can:

- **Discover biomedical engineering and veterinary careers** as they explore how STEM professionals work together to rescue an injured dolphin and develop a prosthetic tail.
- **Explore robotics and computer science careers** while learning how sensors, circuits, and programming are used to develop innovative robotic technologies.
- **Investigate energy and environmental careers** as they evaluate alternative energy sources and explore solutions to real-world energy challenges.

Celebrate **National STEM Day** by inspiring your students to discover where STEM can take them with the help of Learning Blade!

I'll also be attending the Illinois Education & Technology Conference (IETC) and would love the opportunity to connect, share what's new with Learning Blade, and explore how our fully funded resources can support your educators and students!

*If you aren't already using Learning Blade, remember that it is **FREE** to create a new account: www.LearningBlade.com/IL, or for more assistance on how to use Learning Blade, get expert tips and support with your state manager: Schedule Here*
