

Accounting Career Exploration - 30 pts

Accountants are the backbone of the business world. There are many accounting careers you may not realize. Use the link below to pick an accounting career to explore. Don't limit yourself to just information on the link below (site other resources). Choose an option below and meet with me to discuss your finished project for credit. Add your project to [this collaborative page](#).

Career Options

Option 1

Write a one to two paragraphs (or more) summary of the accounting career you chose. Make sure to include information on a professional in that career (Real Life CPSs at the bottom of the site).

Write a one to two paragraphs (or more) reflection on the information you learned. Did you learn anything interesting about that career? Is that career something you could see yourself doing? Why or why not? Other thoughts, feelings, or reactions.

Option 2

Create a presentation with ten or more slides that has similar information to what's above (summary and reflection of what you learned). The presentation should have images and other media. Think about having less info on a slide, more slides, and more images.

Option 3

Something else creative that gives me a summary and reflection of what you learned.

**Points awarded/lost based on the [creative computer assignment rubric](#).
