

Audio Visual Requirements for Dr Katherine Iscoe

Katherine's presentations are high-energy and entertaining, relying heavily on the right audio-visual set-up to ensure your audience gets the best value and enjoy each moment.

Important

She is well known for her unexpected opening (an audience favourite). This requires her to use her own Mac laptop (i.e. her presentation is not transferred to the main computer) as this is needed to create a live feed for the opening using the [CAMEO \(live video\) feature](#) within Keynote (Apple) (*see photo below*).

This requires a HDMI cable and a good quality audio system will be required connected from her laptop using 3.5mm sound lead.

Her presentation is 16:9 ratio.

Microphone

She requires either a lapel or headset microphone (aka Madonna mic) as her hands need to be free for various 'surprises'.

She can bring her own headset microphone which is a [Samson XPDm Headset Digital Wireless System](#).

Whenever possible, please have the stage free of a lectern (Katherine is only 5'1 so she'd need a booster seat to use it anyways).
