Steroid Policy

The San Francisco Unified School District ("SFUSD") recognizes that the use of androgenic/anabolic steroids presents a serious health and safety hazard. Steroids can keep youth from growing to their full height; they can also cause heart disease, stroke, and damaged liver function. Men and women using steroids may develop fertility problems, personality changes, and acne. Men can also experience premature balding and development of breast tissue. These health hazards are in addition to the civil and criminal penalties for unauthorized sale, use or exchange of androgenic/anabolic steroids.
