

To access Eggscape in the headset, we kindly request that you provide us with one or more email addresses associated with each headset. We will send Oculus invites containing the app to those email addresses, allowing the game to be directly added to the app library of each respective headset.

[For the multiplayer mode, it is important that each headset has a unique account. Please ensure that you provide a different email address for each headset. Eggscape supports up to 4 players in multiplayer mode.]

Eggscape is compatible with headsets Meta Oculus 2, Oculus 3 and Oculus Pro.

To whitelist the email addresses and enable access to the game, please send an email to ro@eggscape.ar

Further instructions will be provided to you upon submission.

THANK YOU!
