

Xobin – Tellent Recruitee Integration Guide

This guide explains how to integrate Xobin with Tellent Recruitee so recruiters can send assessments, track candidate progress, and review results without leaving their hiring workflow. The integration connects candidate evaluation directly with recruitment management, reducing manual effort and improving hiring efficiency.

Prerequisites

- Access to an active Xobin account
- Access to an active Tellent Recruitee account

What does the integration do?

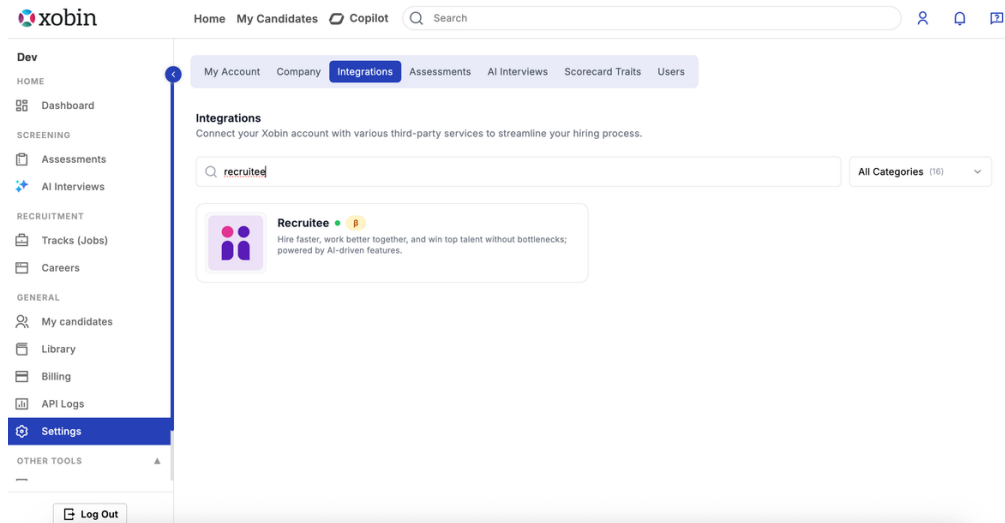

The Xobin–Tellent Recruitee integration allows recruiters to send candidate assessments directly from Tellent Recruitee and manage evaluation without leaving the recruitment platform. It connects the candidate testing process with the hiring workflow so recruiters can assign tests, track invitation status, and monitor candidate progress from within the Tellent Recruitee interface.

Once candidates complete the assessment, their scores and detailed Xobin reports are available directly on the candidate profile in Tellent Recruitee. This streamlines the screening process, reduces manual effort, and helps hiring teams evaluate candidates faster using structured skill assessments.

Setting up the integration

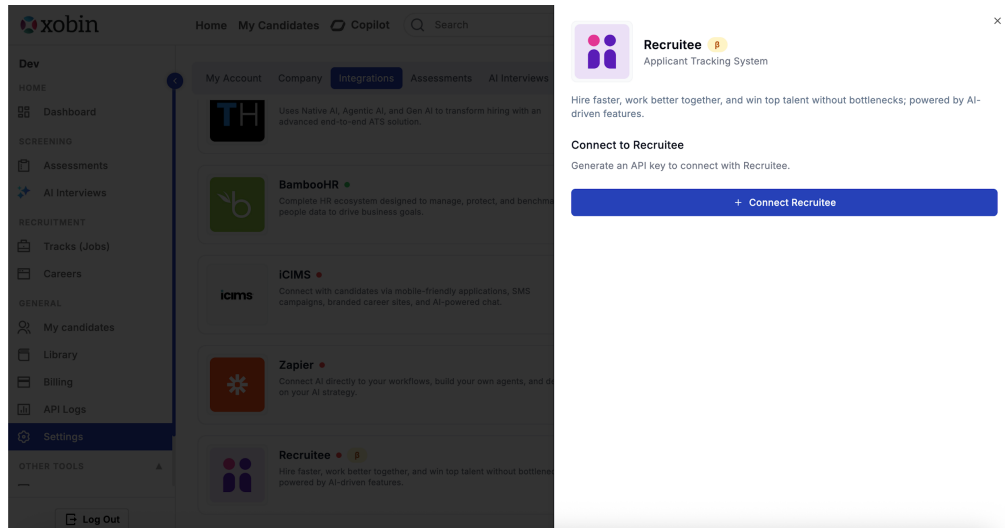

Step 1

Go to **Settings** → **Integrations** in Xobin. Search for Recrutee and select it.

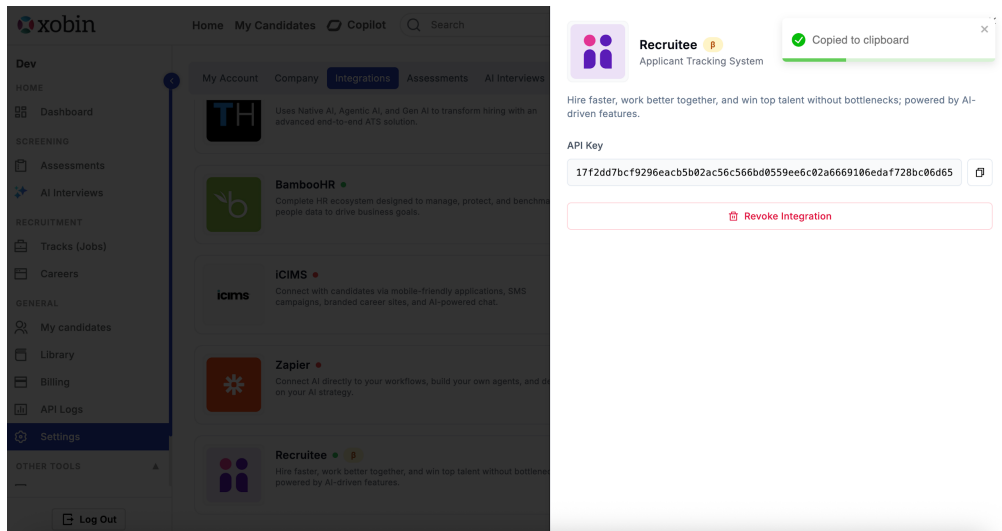

Step 2

Click **Connect Recrutee** and generate your API key.

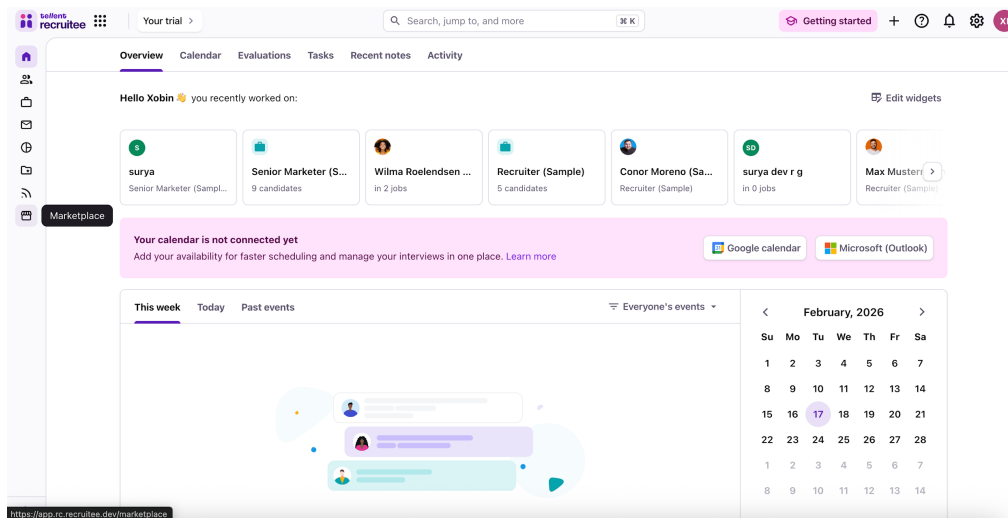

Step 3

Copy the generated API key.

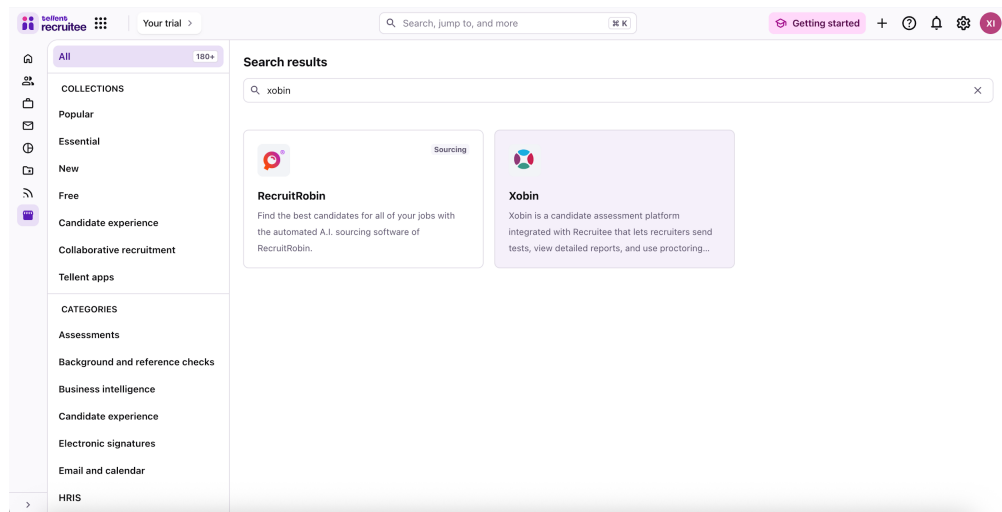

Step 4

Open your Tellent Recrutee dashboard and go to [Marketplace](#).

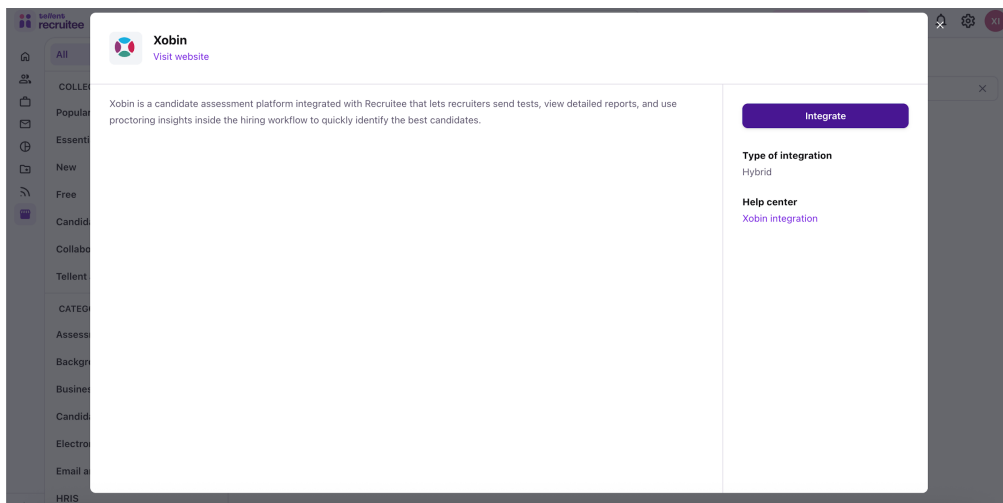

Step 5

Search for **Xobin** and select it.

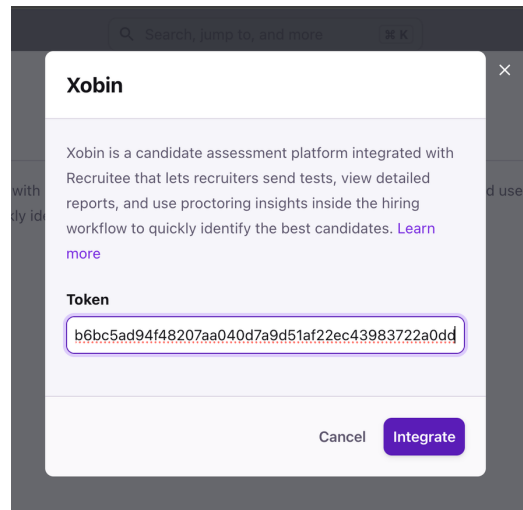

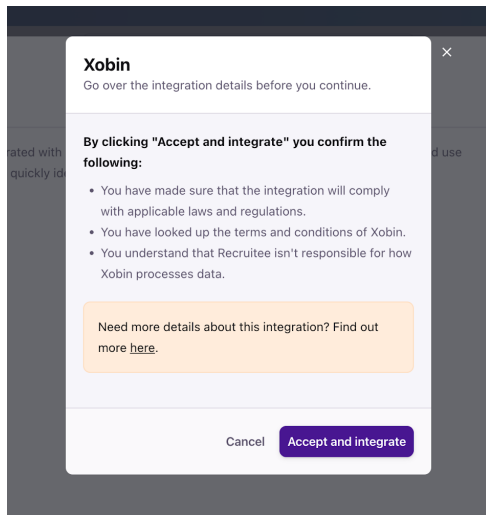

Step 6

Click **Integrate** in the window that opens.

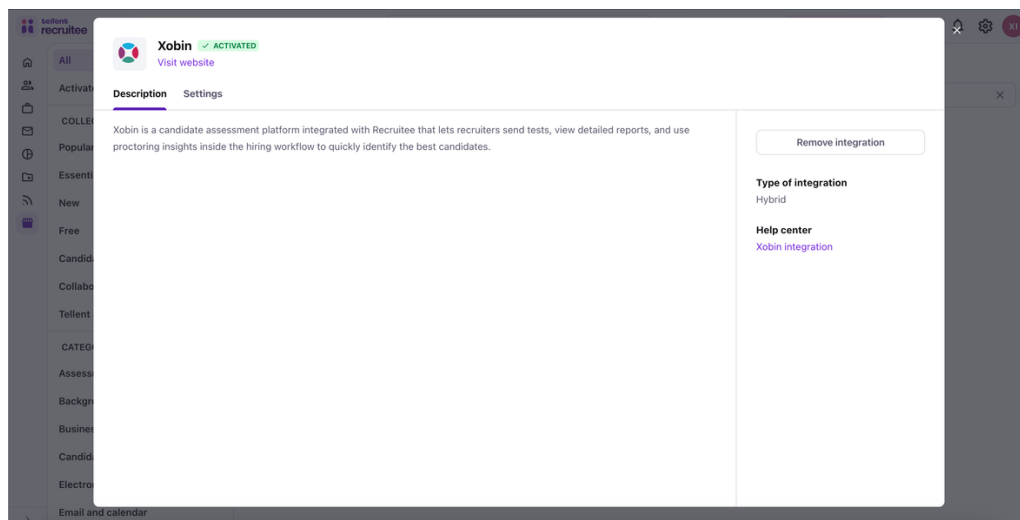

Step 7

Read the terms, click **Accept and Integrate**, then in the new window enter your API key and click Integrate.

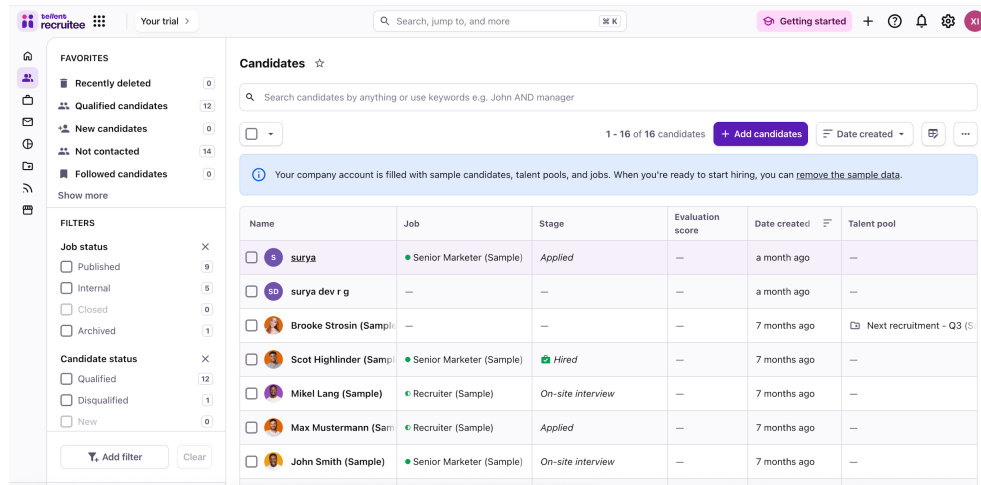

Xobin is now successfully integrated with Tellent Recrutee.

Inviting a Candidate to an Assessment from Tellent Recrutee

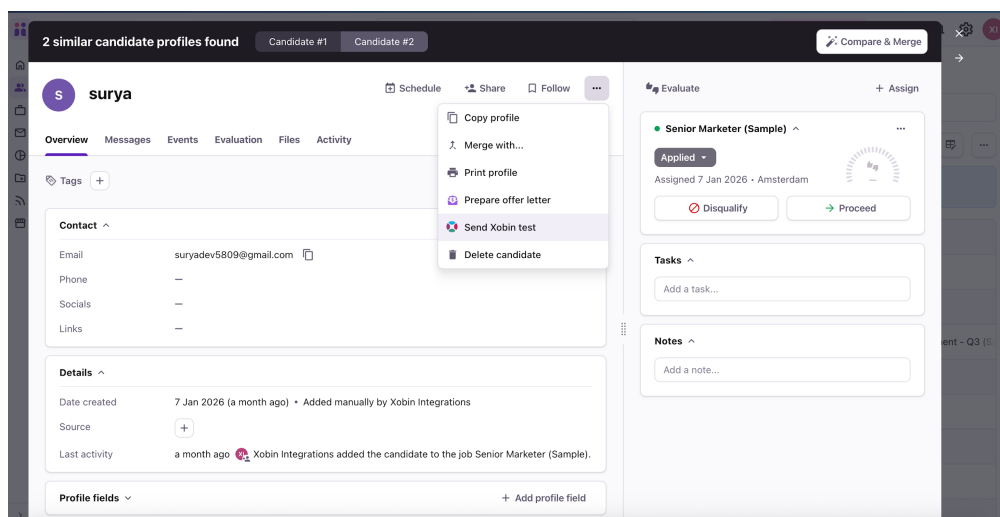

Step 1

Go to the Candidates section and select the candidate you want to send an assessment to.

Step 2

Inside the candidate view, click the three-dot menu in the top-right corner and select **Send Xobin Test**.

Step 3

In the Send Xobin Test modal:

- Fill in the candidate details
- Select the test you want to send
- Click Send

Send Xobin test
surya

First name
surya dev

Last name
R G

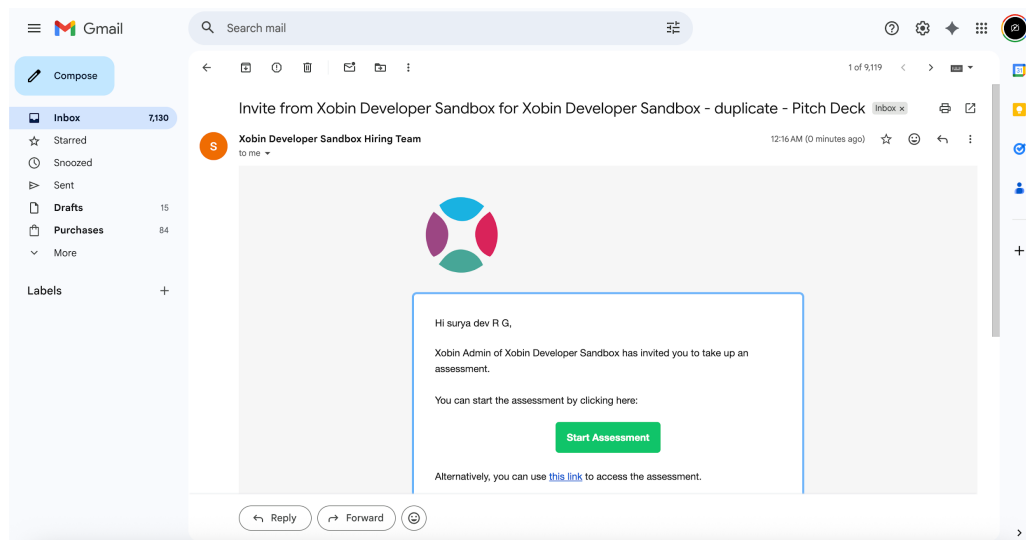

Email address
suryadev5809@gmail.com

Tests
Xobin Developer Sandbox - duplicate - Pitch Deck

Cancel **Send**

Step 4

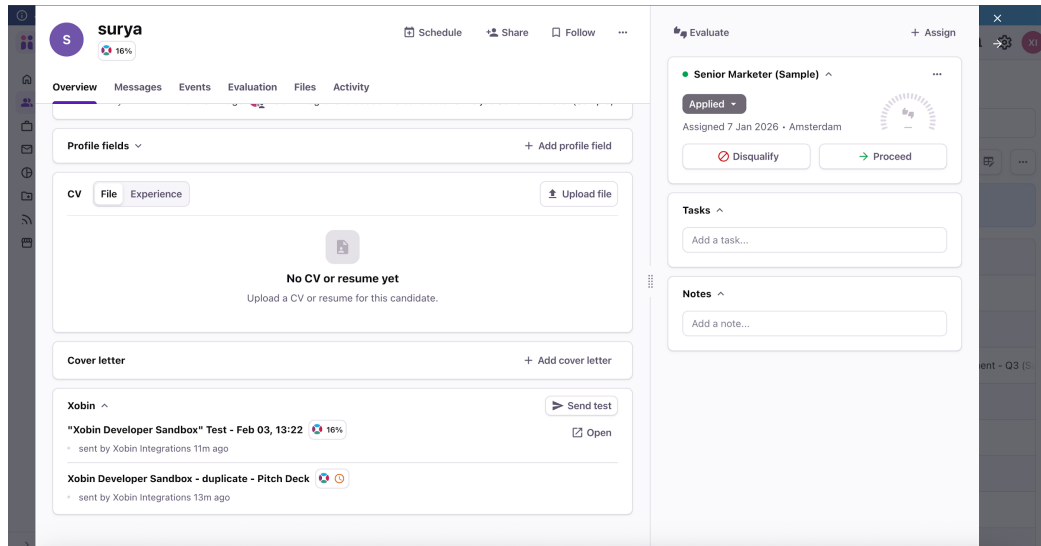

The candidate receives the assessment invitation via email.

Viewing Candidate Results:

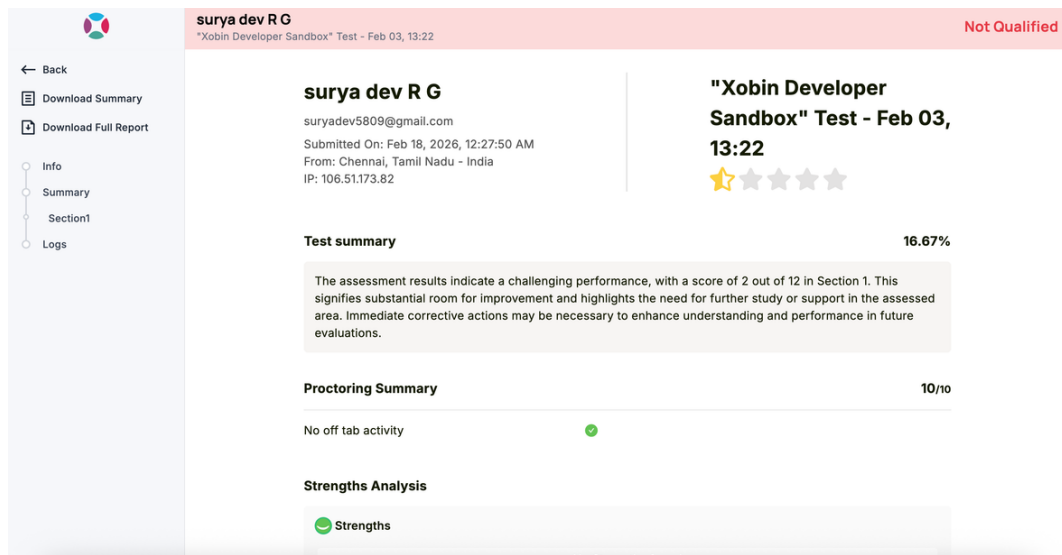

Step 1

In the candidate view, scroll down to the Xobin section. You will see the candidate's assessment history, scores, and report link

Step 2

Click the report link to open the detailed assessment report
