

Study tips for Chem 241/242a:

- **PRACTICE QUESTIONS** - One of the best ways to study for organic chemistry is by doing practice questions and tests. Practice tests are usually provided by the professor and questions can be found in the textbook.
- **SI (SUPPLEMENTAL INSTRUCTION) SESSIONS** - SI Sessions are offered by the University as a free way to complement your learning with help from students who have taken the class already. These sessions are a great way to ask questions, practice the content, and learn from your peers!
