## //Description and tooltip

**Stack Size:** 5

**Short Name:** T.Twizzter

**Long Name:** Tongue Twizzters

**Description:** "A pack of tongue-transforming Tongue Twizzters!"

**Tooltip:** A Xenogen product, Tongue Twizzters was introduced by the company to give its users a wide range of different attributes to their tongues based off various alien species, as the name would suggest. The packaging is a bright-red, lists various effects and side effect, advertises a cherry flavor, and contains a few licorice-looking, cherry-coloured sticks. There's also a large bit of white-and-red text that warns of "unwanted transformations" should the consumer overuse this item.

**Price:** 500

**Sold By:** Sera, temporarily, then Sweet P's when added.

## //Use text

You take a moment to gaze upon the bright-red, plastic packaging of the Tongue Twizzters, along with all the text advertising its effects, and the warnings of overuse. After you finish your inspection, you tear the little case along an indicated line, granting you access to the transformative contents within. Pulling the plastic container's bounty out, you reveal a

cherry-red, swirly stick of licorice, or at least that's what it appears to be, but you know full well that this bit of candy is laced with DNA-rearranging nano-surgeons {pcBimbo:, right? //Else:.

Well, there's no turning back now. You lift the spiraling shaft of transformative licorice to your mouth, and take a bite.

Huh, nothing yet.

Regardless, you start to chew, and *then* you start feeling something: your tongue starts to tingle, just slightly. You guess it to be a sure sign that the Tongue Twizzters are working and continue grinding the candied gene-mod between your teeth, soaking your oral organ in its sweet flavor until you're practically drooling.

Once you're done, you throw the leftovers {ifShip/Civilization: into a nearby trash receptacle //Else: onto the ground {ifSilly: like the dirty polluter you are}} and are now left to wait for for the Tongue Twizzters to take effect.

[Next]

## //Effects

Grants the following flags, one transformation per item use, changes occur 1 minute after use:

- Long - ½ chance if PC does not have long flag.
- Prehensile - 100% chance if PC has long flag and no prehensile flag, requires long flag.
- Tapered - ⅓ chance if PC does not have tapered flag.
- Hollow - ⅓ chance if PC does not have hollow flag.
- Lubricated - ⅓ chance if PC does not have lubricated flag.
- Nubby - ⅓ chance if PC does not have nubby flag.
- Squishy - ⅓ chance if PC does not have squishy flag.
- Sentient - ⅓ chance if PC does not have sentient flag, requires long and prehensile flags.

## //Long

**<b>The Tongue Twizzters are doing something!</b>**

You can feel that gentle tingling numbing your tongue to the point where you just barely sense it jut forward, followed by a sore, if diluted, pain, almost like you've pulled something. That feeling of discomfort continues for a short while, and then your mouth starts to feel very, very full. So, you do the only thing you can do and open your mouth and let your tongue loll out of it and over your lips.

Looking down, you're able to see a lot more tongue than you were able to before, and now you're almost certain that the pain you were feeling earlier was your [pc.tongue] stretching to its new length.

Just to make sure, you retract your oral organ back between your lips and let it loll out once more, and sure enough: <b>your tongue has gotten longer</b>.

[Next] //Adds libido and the long flag to the PC's tongue.

## **//Prehensile**

<b>The Tongue Twizzters are doing something!</b>

That gentle tingling gives way to an incredible smoldering sensation in your [pc.tongue], not necessarily heat, but that burn you feel after a hard workout... only in your tongue.

Eventually, the pain dies down and you're left feeling like your mouth-muscle has gotten stronger. You {ifShipCivilization: search for the nearest mirror or reflective surface //Else: let your [pc.tongue] loll from your mouth} and give your elongated tongue a flex, and sure enough, it bends, but more than that: it seems to you like your modded-up oral organ is capable of making very minute movements. To test this little theory, you hold up a single finger, and attempt wrap your [pc.tongue] around it, coiling your slick muscle around your digit oh-so slowly, watching every movement it makes until, like you guessed it could, your tongue is encasing your extended member completely.

<b>Looks like you've got yourself a prehensile tongue</b>, and all you can think about is the oral pleasures you could provide a lover with a muscle like this at your disposal.

Maybe you should go test it out.

[Next] //Adds libido and the prehensile flag to the PC's tongue.

## **//Tapered**

<b>The Tongue Twizzters are doing something!</b>

You're hit with the strangest feeling as the gene-mod goes to work, almost like your tongue is <i>dissolving</i>. It's not an unpleasant sensation, just an odd one, like your tongue is fizzing away, whittling it down ever so slow, leaving you to hope this isn't one of the side effects the package mentioned.

Finally, your oral organ seems to stabilize, leaving it feeling particularly lighter. Interested to see what your Tongue Twizzters did, you {ifShipCivilization: search for the nearest mirror or

reflective surface //Else: let your [pc.tongue] loll from your mouth}, only to see that your tongue is a bit sharper-looking, tapered to a point.

<b>You've got a tapered tongue!</b> That should make it easier to reach your mouth muscle into all those hard-to-reach places.

[Next] //Adds libido and the tapered flag to the PC's tongue.

## **//Nubby**

<b>The Tongue Twizzters are doing something!</b>

The tingling on your tongue continues, but it seems to be spreading. You can feel the once tickling buzz of the Tongue Twizzters getting stronger, and... hotter? Yes! Hotter! You can practically feel your tongue melting, boiling, even. Opening your mouth, you start to pant in an attempt to vent some of the heat from your mouth {ifCivilizationNotBimbo:, hiding your face in an attempt to keep your dignity}.

You {ifShipCivilization: search for the nearest mirror or reflective surface //Else: let your [pc.tongue] loll from your mouth}, only to see that it appears to be boiling! Little bumps continue to pop up on your tongue for a few more moments, an intense heat pouring off your mouth muscle until it all comes to a stop and you're greeted by the sight of your latest addition: a nubby tongue.

<b>Your [pc.tongue] is now covered with little bumps and nubs</b>, leaving you to wonder how pleasurable these would be for a lover, either in or wrapped around their naughty bits.

[Next] //Adds libido and the Nubby flag to the PC's tongue.

## **//Lubricated**

<b>The Tongue Twizzters are doing something!</b>

Not more than a moment later after that licorice-looking gene-mod gets to work, the Tongue Twizzters make you feel as if you're salivating, to the point where you feel the need to continuously swallow.

{IfCivilizationNotBimbo: Against all your senses of decency, you //Else: You} let your [pc.tongue] loll from your mouth, only to observe its become very, very wet. Taking a finger to your oral organ, you slide it across the flat of your tongue, slide being a very good descriptor of what your finger does, as it seem your tongue is now producing its own lubricants.

<b>Your tongue is now lubricated</b>, allowing it to slip and slide all over your mouth... or a lover's genitals, if you're the type for that.

[Next] //Adds libido and the Lubricated flag to the PC's tongue.

## //Hollow

<b>The Tongue Twizzters are doing something!</b>

That tingling feeling spreads through your mouth, numbing it until you're barely able to sense your [pc.tongue] moving on its own, twisting each muscle, curling and rolling itself.

{random50/50: Wait, could you roll your tongue like that before? //Or: You briefly remember something about tongue rolling being an inheritable gene, must be from your dad.}

Your thoughts are interrupted when your coiling oral organ refuses to unroll itself, causing you to worry for a moment before that tingling sensation you were feeling before returns in force.

{pcShip/Civilization: You rush your way to the nearest mirror or reflective surface and let your tongue loll out to get a better look at what's happening to your tongue. //Else: You let your tongue loll from your mouth in an attempt to get a better look at what's happening to it.}

The sight you're greeted with is very peculiar: your mouth muscle seems to be <i>welding</i> itself together at the gap where it's rolled up, new flesh growing there to hold your oral organ together where it is, keeping a tubular form. Finally, that sight and feeling comes to an end, and you're left looking at your newest, quite alien addition: a proboscis-like tongue.

<b>You now have a hollow tongue!</b>

[Next] //Adds libido and the Hollow flag to the PC's tongue.

## //Squishy

</b>The Tongue Twizzters are doing something!</b>

You're letting that gentle fizzle of the gene-mod on your [pc.tongue] numb your oral organ, when all of the sudden, the weight of your tongue in your mouth feels very dissipated, almost like your tongue has gotten less dense.

You cock an eyebrow at the curious sensation as it fades, place your tongue between your teeth, and bite down; to your surprise, your mouth muscle isn't very strained under the pressure of your chomp down. As another quick test, you flex your tongue around a bit, each time you do: it compacts itself, taking up quite little room. Seems as if your [pc.tongue] has gotten a bit softer...

<b>You've got a squishy tongue!</b> That should make it easier for your oral organ to fit into tight places.

[Next] //Adds libido and the squishy flag to the PC's tongue.

### **//No effect**

</b>The Tongue Twizzters are doing something!</b>

The tingling sensation on your tongue continues for a short moment, but slowly pitters out without a single transformation to show for it, leaving you disappointed and your [pc.tongue] numb.

What a ripoff!

[Next] //We ain't found shit.

### **//Sentient**

</b>The Tongue Twizzters are doing something!</b>

That pricking and poking sensation on your tongue is getting stronger by the moment, to the point where you feel like it's burning! You can practically feel your [pc.tongue] melting, boiling, even. Opening your mouth, you start to pant in an attempt to vent some of the heat from your mouth {ifCivilizationNotBimbo:, hiding your face in an attempt to keep your dignity}. Making your way to the nearest reflective surface to see exactly what your pyromaniac of an oral organ is doing, that blazing hotness seems to cool, leaving you with quite the profound sense of bliss and relief. Nonetheless, {ifShip/Civilization: you still find your way to the nearest mirror //Else: pull out your codex, open its camera display application,} and get your face well within view.

Meeting your own gaze, you're filled with the sudden urge to open your mouth, so you do so, unhinging your jaw and peering straight into your maw in an attempt to get a look at your tongue.

Then your [pc.tongue] jumps out of your mouth.

Wait... you didn't do that, or at least you don't think you did.

No, you're sure of it: your modded-up mouth muscle is moving on its own, shifting left and right as it lolls out from between your lips.

This whole experience is more than a bit odd, but determined to wrangle this organ back in its place, you summon your mental strength, pull your tongue back into your mouth, and hold it

there. Then, as a quick experiment, you relinquish control over your [pc.tongue], and sure enough, it starts to wriggle around in the hold of your maw, but as soon as you focus on it again, your tongue falls back in line and stays still.

<b>Looks like you've got a sentient tongue!</b> This must have been one of the unwanted transformations the package warned about, but it could be some fun.

[Next] //Adds libido and the sentient flag to the PC's tongue.

### **//Sentient flag description**

Used for the [pc.tongue] parser.

Flag Descriptors:

- Sentient
- Self-aware
- Wriggling
- Squirming

Examples:

- "Your wriggling tongue..."
- "With your long, sentient oral organ..."

Self-Description:

- Added at the end of the tongue call: "... tongue that has a mind of its own."
- In description: "Sentient tongue..."
