Notes

- This archive includes downloads for all available versions of Maw Mod.
- Opensource files are also included, usually for the last patch of each major edition of Maw Mod.
- All files are hosted via Drive, with the latest update also being hosted through MEGA.
- Expect some unfinished features and instability in 'Test' and 'Beta' versions.
- Note for Maw Mod v3: Remember that **running an older version** of Maw Mod v3 will lead to **losing progress** in later versions of Maw Mod v3! So be sure to **make a backup first**; this can be done manually by copying the fileM.sav file in the **C:\Users\yourusername\AppData\Local\Bloons_TDX** folder pathway; alternatively, you can use any version of Maw Mod v4 to merge your v3 save file into your v4 save file before and after playing.
 - v3 and v4 each have a different save file, so you won't lose progress in one by playing the other.

Known Bugs in v4AA

- Playing certain challenges and side missions as the first match of a game session may crash the game due to missing variables. Make sure to start up a regular match first if this happens, as doing so will initialise those missing variables.
