### The Fastest Way To Start Having Fun With Your Watercolour Journey

If you recently started dabbling with watercolour and have ever said one of these self-sabotaging lines like:

*“I need to paint this **perfectly**” (Knowing that none of your paintings could be perfect just yet...)*

*“I’m not **good enough**... I don’t even **know** what colors to mix...”*

*Or “I don’t know where to start!!!”*

Then this comprehensive booklet might be the ‘key’ to unlocking you from those “beginner chains” that often hold 99% of beginner painters back.

Without this knowledge, Most beginners often quit after experiencing months of the same “chore-like” feeling that comes with unwise painting.

This booklet will especially tackle common issues, such as:

- Deciding what combos of colors you should mix to get that “POP” effect out of your paintings,
- Not knowing how many strokes to apply to your painting,

- Feeling **Overwhelmed** about the dos and don'ts when it comes to painting, *(Which might lead you to say "I'm not talented enough")*
- Your "creative spark" is not sparking, leading you to a staring competition with your Canva...

Whether it's before, during, or after the painting's finished...

This guide contains **3 step-by-step** guides for any and every obstacle a beginner watercolor painter might face!

Brush techniques, Color Theory, Equipment/supply choices? All of your questions have been answered in the handbook.

So, If you wanna know how you can create gorgeous watercolor paintings from the very palm of your hand (Plus make everyone drop dead from your captivating framed pieces),
