

Topic Overview

36th National Selection Process of the European Youth Parliament in Germany

Splitting atoms and opinions: *As the EU continues its path towards balancing climate targets and energy security, the role of nuclear power in the green transition is heavily debated. Member States of the EU and other stakeholders have various opinions on nuclear power and whether it can be considered sustainable. Should the EU continue integrating nuclear energy into its climate strategy, and if so, under what conditions?*

Name/School/Organisation:
