- The pages don't fit the screen and can't be resized
- there is no ability to quote a previous post
- embedded images don't work
- icons overlay the text

Edc <http://www.lthforum.com/bb/viewtopic.php?f=47&t=42795>

- If possible I would like to have it go to the bottom of the previous page, because if one is paging backward, the posts at the bottom of the previous page are chronologically closer to the current page.

- Click the title of a single post to view entire thread.

Midas - <http://www.lthforum.com/bb/viewtopic.php?p=506804#p506804>

- Stuff on side distracting, same picture over and over

Da Beef - <http://www.lthforum.com/bb/viewtopic.php?p=506811#p506811>

- make the spacing a bit better when writing text under a pic?
- ditch the index threads that stay atop each chat section

Jefe -

- Agree with da beef above added "This might also have to do with the size of the font taking up more real estate."
- on the main bb page, I used to like how it listed latest post not just by author and time but also the name of the post or thread.

Pie Lady <http://www.lthforum.com/bb/viewtopic.php?p=506833#p506833>

- Google links to single posts no way to click to entire thread
- *that icon (arrow) as well as all the rest, including the emojis, are microscopic. Can the size be increased?*

Zoid - <http://www.lthforum.com/bb/viewtopic.php?p=506863#p506863>

- *I can't see the threads I've posted in.*
- *I can't see the threads that have new posts since I last read them.*
- *I don't get the snippet of the OP when mouse hovering anymore.*
- There a far fewer threads visible due to the new large format. It's very much harder to read and navigate.

Bbqbyrds - <http://www.lthforum.com/bb/viewtopic.php?p=507231#p507231>

- Not crazy about the typeface

Riddlemay <http://www.lthforum.com/bb/viewtopic.php?p=507080#p507080>

Lougord99 and ekreider- <http://www.lthforum.com/bb/viewtopic.php?f=47&t=42900>

- Dropdown under name is touchy or unresponsive

Princessducky - <http://www.lthforum.com/bb/viewtopic.php?f=47&t=42912>

- *my Lastpass comes up and then logs me in and then takes me back to the chat*

Boudreaulicious - <http://www.lthforum.com/bb/viewtopic.php?f=47&t=42783>

- it takes me to the first post in the thread, versus to the first unread post

SteveZ - <http://www.lthforum.com/bb/viewtopic.php?p=506868#p506868>

- +1 on the missing icons on the mobile version

Mailsf - <http://www.lthforum.com/bb/viewtopic.php?p=507294#p507294>

- Text being cut off

Mrbarolo - <http://www.lthforum.com/bb/viewtopic.php?p=508678#p508678>

- *Missing the icons next to name*

Bobbywal (and many others)- <http://www.lthforum.com/bb/viewtopic.php?f=47&t=42778>

- Text is too large / too much space between posts / vertical scroll

Roger Ramjet

- Gray on gray hard to read

JoelF (and EvA)- <http://www.lthforum.com/bb/viewtopic.php?p=506830#p506830>

- Bold or color or different typeface for forums with new posts

Boudreaulicious - <http://www.lthforum.com/bb/viewtopic.php?p=506884#p506884>

- Smaller text larger icons

Nr706 - <http://www.lthforum.com/bb/viewtopic.php?p=506887#p506887>

- Would like view unread posts on bottom of page as well as top.

WillG - <http://www.lthforum.com/bb/viewtopic.php?p=506899#p506899>

- Is there a way to just see the posts that are new since my previous visit?

Nr706 - <http://www.lthforum.com/bb/viewtopic.php?p=506924#p506924>

- Scroll to top arrow not appearing on every page (only some)
- If I go straight to a new page it doesn't appear. But if I scroll the page up a little bit, it does appear.

Chgoeditor - <http://www.lthforum.com/bb/viewtopic.php?f=47&t=42778&start=30>

- Font too big - excessive scrolling needed - can't skim posts easily
- Icons small

Drover - <http://www.lthforum.com/bb/viewtopic.php?p=506982#p506982>

- Text size
- Make color of font darker
- Ditch stuff on the right side of the screen
- Dead space on the left unnecessary waste of space
- "I liked being able to quickly scan through the topic list and find the ones I had posted in."
- "finally, one shouldn't have to hover over tiny little icons to discover their meaning if they're not already intuitive."

Tem - <http://www.lthforum.com/bb/viewtopic.php?p=507005#p507005>

- Font way way way way way way too big
- Too much wasted space decreases real estate and scrollability

- Ditch stuff on the right side

Drover - <http://www.lthforum.com/bb/viewtopic.php?p=507014#p507014>

- the stuff underneath people's screen names, the icons above topic thread names, the descriptions below them, the names and dates of last poster/latest post, etc. It's all a light shade of gray. + signatures too.
- not getting notifications of new posts in threads I'm active in.

Sundevilpeg - <http://www.lthforum.com/bb/viewtopic.php?p=507036#p507036>

- +1 on washed out text color

BR - <http://www.lthforum.com/bb/viewtopic.php?p=507059#p507059>

- On my iPad, opening in a new tab does not work correctly anymore. It opens the post I'm clicking on in both the current and new tab.

Leek - <http://www.lthforum.com/bb/viewtopic.php?p=507077#p507077>

- "When I click on the "new posts" I don't get all of them. Not sure how far back it's not going, but I think the last time I visited was Fri the 22nd. Lots of posts from that day are Grey if I look in the topic area, but didn't come up on my "new posts."
- Color of font not contrasty enough
- having some indicator that it's clickable before you hover your mouse would be helpful.
- it used to be that along with the poster's name there was the name of the thread (topic title?), unless the poster had changed it. When I go to the "new post" for a thread, it doesn't let me know what the topic is unless I scroll to the top or bottom of the page.

Dave148 - <http://www.lthforum.com/bb/viewtopic.php?p=507111#p507111>

- when I receive a PM and I want to reply to it, there's no way for me to see the original message that was sent to me as a reference while I'm typing the reply.

Tem - <http://www.lthforum.com/bb/viewtopic.php?p=507144#p507144>

- I don't quite understand the point of showing a preview of the first post in a thread if you hover over the thread title.

Threadkiller - <http://www.lthforum.com/bb/viewtopic.php?p=507180#p507180>

- The font for the titles of threads is a little off on Windows 10 w/Chrome - in LTH for example, one can barely see the crossing on the H, and a few of the other letters, such as e, are difficult to read.
- When looking at the list of threads, it's not clear how to jump to the first unread in the thread.

Kman -

- Text huge icons small
- "I also miss the old way of noting threads that had new posts."

Mamagotcha - <http://www.lthforum.com/bb/viewtopic.php?p=507509#p507509>

- +1 to a lot of issues
- "I only scan for the cooking- and gardening-related posts... now it feels like they are buried and hard to find."
- "The off-centered "table" T of the logo makes me flinch. Any chance of a proper centering?"
- "The word "chat" for forum use feels wrong. Chat is usually a live back-and-forth thing, not a bulletin board-style system."

Roger Ramjet - <http://www.lthforum.com/bb/viewtopic.php?p=507681#p507681>

- Dislikes the header popping down (and up) automatically
 - (a few people agree)

Katie - <http://www.lthforum.com/bb/viewtopic.php?p=507698#p507698>

- "active topics" and "unread posts" be more readily accessible
- Italics not working

lougord99 - <http://www.lthforum.com/bb/viewtopic.php?p=508190#p508190>

- philosophical problem - decision to immediately take the viewer to the first unread post when clicking on the topic title.

Boudreaulicious - <http://www.lthforum.com/bb/viewtopic.php?p=509025#p509025>

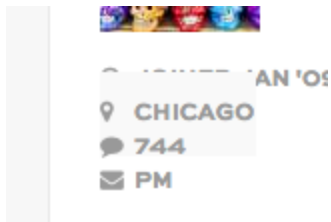

- huge font and cut off posts on mobile (even when you switch to horizontal orientation) and
- the fact that you can't make minimize or maximize the screen view on mobile addressed and they're definitely not fixed.

Mamagotcha - <http://www.lthforum.com/bb/viewtopic.php?p=509071#p509071>

- I see that it seems to be sometimes to the first unread, and sometimes to the first in the thread. Do you have to be subscribed? What's the magic formula?
