

Street Savvy Dog Rescue

Here is our approved list **POSITIVE TRAINERS/Force-free aka Fear-free** (we do not allow the use of prong collars, pinch collars, choke collars, E collars, citronella spray, spray bottles, etc) and Street Savvy Dog Rescue will not adopt dogs out to adopters who use aversive training methods. Science has proven that using positive training methods elicits the most successful results. Aversive training methods actually do additional damage to dogs and they may even become aggressive or more fearful as a result of using these type of training methods and harm your dog both physically **AND** psychologically.

Please use our approved list of **POSITIVE TRAINERS AND BEHAVIORS** if you feel the need to seek out ways of improving dog's interactions with other dogs and others in the community, work on obedience training and behavioral challenges and/or generally improving your knowledge base!

POSITIVE TRAINERS (Aversive-free trainers behaviorists)
