

## Acknowledgements

To K and M,

Just some of the great letters out there, without whom this book would just not be possible.

Similarly, thanks to Chaucer for pioneering the english written language as we know it today, and Jimmy Page, inventor of the written page.

Editor's note: Some would argue the page was simply a riff on the papyrus used by blues musicians for years.

To the good people at Sprite, who bought this add space.

Sprite: The Taste that Satisfies the American Health Authorities minimums

Finally, I would liked to dedicate this book to my darling husband.

Whoever he may be by now. .

The publishers would like to acknowledge this book isn't very good.

No animals were harmed in the making of this book, despite requests. A lot of tree's died in hindsight senselessly for the paper.
