

MEMORANDUM

Nordic Nuclear Autonomy:

A Decisive 'Last Straw' in the Non-Proliferation Regime's Fiasco and Strategic Leverage for a 'Very Big Deal' on US-PRC Synergy.

TO: The President of the United States, heads of relevant U.S. authorities, NB8 and our other partners.

FROM: Elijah Sedlexsky

DATE: February 6, 2026 (revised February 13, 2026) (**updated PART II, February 18, 2026**)

SUBJECT: Extraordinary shift toward Northern European nuclear autonomy - #NordicNuclear. Etiology and impact of the shift on the breakdown of non-proliferation and non-use of WMD. Measures by the U.S., EU, PRC, and their partners for reversibility and achieving US-PRC Synergy.

STATUS: Declassified.

Part I: Analytical.

Part II: Factual.

Part III: Assessment Guide.

Part IV: Mission of the primary decision-making.

Part V: Statutory Definitions: Malitiosus , Animus Nocendi / Necandi , #SimulacrumPower , Apotheosis.

ANNOTATION

An extraordinary Jantelagen Shift has been detected – real, substantial, and joint actions to transition the coalition of Northern European countries (leaders in non-proliferation and disarmament, paragons of peacekeeping and pacifism) toward the practical implementation of nuclear sovereignty. The ultimate objective is the formation of high-mobility Dual-Capable Aircraft (DCA) strike units within the Nordic Air Force, featuring autonomous C2 chains and Nuke.

Data received in January–February 2026 from Northern European authorities and other sources of high and highest reliability collectively confirm the political decision and the commencement of the Northern European Coalition's practical movement toward [#NordicNuclear](#) Autonomy to avoid the realization of precedents against them and their military allies in Europe known as:

- Budapest Memorandum,
- #CoventryDilemma,
- #OperationCatapult, under the RF flag, a foreign flag, or anonymously.

This document constitutes a synthesis of classified and declassified intelligence and expert assessments over an extended period. All case-specific factology received in January–February 2026 is contained in the second part, with brief assessments and explanations.

The first part contains an analytical summary.

The analysis incorporated data on the Coalition's military and industrial readiness and the doctrinal shift in the political planning of the authorities defining the Coalition countries' foreign policy. Secondary irritants that prompted their decision are listed. The primary objective stimulus for their decision on nuclear autonomy is revealed and described – the already expertly recognized crisis transition of global actors into a new macro-cycle of their development, occurring synchronously and simultaneously with shorter recursive cycles. This created a resonance effect, sharply shifting the subjective and objective needs and plans for WMD use among the most embittered Malitiosus – the misanthropic "losers" of the transition,

And driven by their fiasco and obsessed with Animus Nocendi/Necandi, their intent is assessed within the range of Almost certain $\geq 95\%$.

Expert confirmation: UK SIS report dated December 15, 2025, reflected in Part I.

PART I : Analytical.

SECTION 1: Consequences for the breakdown of non-use of WMD and its reversibility

In conjunction with other acute tracks in international security and the proliferation of WMD potential, now reflected even in public reports from the USIC, DoD, and UK SIS, the movement toward [#NordicNuclear](#) Autonomy – Jantelagen by countries universally recognized as leaders of the non-proliferation movement and paragons of peacekeeping and pacifism, is capable, as a Last Straw, of truly breaking all non-proliferation and non-use regimes for all classes and generations of WMD.

The breakdown process is not yet irreversible.

Conditions for reversibility and the role of autonomy as a Leverage for U.S.-PRC Synergy are in Section 5.

SECTION 2: Secondary irritants

The processes [#NordicNuclear](#) Autonomy and the breakdown of non-proliferation and non-use are not direct consequences but are stimulated by the following secondary irritants:

1. Crisis convulsions in US policy (*desperate #USA_throes*), including trade and monetary blackmail of partners, plans to annex Greenland and Canada, significantly new forms and methods since the end of WWII, goals and objectives of the use of US military force already enshrined in the NSS, consensus among current US leaders about the so-called “ *edge* ” of a *precipice* ,” as a result of which, at the turn of 2015, it was vital for US leaders to “... *not a tweak* , but a **regime change** . We must recognize that the current path leads to the ultimate erosion of American sovereignty and the debasement of our national wealth ”, all of which, taken together, have already sharply devalued the military, economic, and monetary guarantees that are still being confirmed by current US leaders.
2. The fifth year of military aggression by cannibal Putin and his dummy [#SimulacrumPower](#) against Ukraine, their implementation of genocide of the people of Ukraine, and in the “ pre-threshold ” stage of the beginning of military aggression by these repeat offenders directly against the countries of free

Europe in the form of a " *new type of hybrid war* ", which, as a false alibi, was enshrined in paragraph 13 of the Concept of Foreign Policy of the Russian Federation back in 2023 ,
<http://www.kremlin.ru/acts/bank/49090>

3. Real preparations of already identified criminals and their accomplices for *non-conventional #WMD ATTACK* under the flag of the Russian Federation, someone else's, or anonymously against Sweden, Denmark, Germany, Britain, Poland, Ukraine, the Baltic states, and our other partners.
4. China's very successful and stable penetration into global trade and economy, known among experts as [#ChinaShocks I II](#). In particular:

PRC has a record global trade surplus of ~\$1.2 trillion,
Coinciding with a record US trade deficit of \$1.2 trillion.

SECTION 3: Main stimulus - avalanche [# Military_civil_amalgamation](#)

Crystallization process [#NordicNuclear Autonomy](#) and other subjective and objective tracks, forcing not only the Northern bloc, but all responsible global actors , in the current conditions, to begin moving towards revising their obligations on the non-use and non-proliferation of WMD, are a direct consequence of the beginning of the avalanche stage [of #Military_civil_amalgamation](#),

– the initial phase of a fundamentally new and macroeconomically ultra-long cycle of accelerating global capital accumulation. This leads to the expansion of joint control by all successful global actors over new vital spaces across all tiers and the real prospect of their penetration and management of even [#dark_energy](#). Declassified data on this, adapted for legal delivery and discussion with relevant clergy and experts of recognized denominations and confessions within their jurisdiction for objective "witness" [דִּי שְׁכָּלוּ שְׁבָרָה](#), and all possible depoliticized peacekeeping and educational activities, are announced under the tags listed here.

The main characteristics of a crisis transition into an Amalgamation avalanche :

- the chances of a successful large-scale [#WMD_ATTACK](#) or a cascade of them are estimated at *Almost certain* ($\geq 95\%$).
- emergence of [#formidable_dangers](#) industries, including [#GNRtechnologies](#) & [#ReusablespacecraftHyperloopFusionPower](#).
- Due to the spread of the newest forms of capital equated to weapons - [#WMD_equivalent](#), the control of successful global actors over new vital spaces of new tiers is significantly expanding, with a scientifically proven prospect of their recursive control [# dark_energy](#) .

Confirmation:

- UK SIS, represented by Ms. Metreveli (December 15, 2025), in her first policy report as head of SIS, confirmed the transition of all global actors into the 4th cycle of development with the prospect of the breakdown of their commitments regarding WMD.

Data on the key points of Ms. Metreveli's report of December 15, 2025, explaining to the general public the causes and consequences of the global actors' transition into the so-called 4th cycle of development [#IV_ЦИКЛ_РАЗВИТИЯ_СИИ](#) (according to the Strauss & Howe "Fourth Turning" / VI cycle version) are available at the link:

<https://drive.google.com/file/d/1ZmD4UEXVp-wgwzqgW6acmwQe93bZLeOh>

Primary sovereign subjects of the crisis tracks forcing the Northern nuclear bloc and other responsible global actors to move toward the breakdown of their non-proliferation and non-use commitments for WMD until the Gentlemen's Agreements & Treaties listed below are approved and executed:

Cannibal Putin and his Russian Federation, Belarus, Ukraine, Iran, North Korea, Republic of Korea, Japan, Germany, Türkiye, State of Israel.

The main non-state actors in Amalgamation are all major centers of military and civilian competence, not just BigTech @ elonmusk , @ PalantirTech , Google , Meta Platforms , [OpenAI](#) , etc .

Lockheed Martin Northrop Grumman General Dynamics AVIC NORINCO CASIC / CASC BAE Systems Rheinmetall Airbus Rostec Hanwha Aerospace Mitsubishi Heavy Industries	Eli Lilly Johnson & Johnson Pfizer Sinopharm Shanghai Pharma Guangzhou Pharmaceutical Roche Novartis Novo Nordisk Takeda Pharmaceutical Sun Pharmaceutical CSL	
---	---	--

SECTION 4: Ensuring the implementation of nuclear autonomy

- **Resources for Nuclear Jantelagen Shift** : Sweden offers more than just *dual-capable aircraft* (DCA) and fractal core *command-and-control* (C2) *Nordic Air Force* , but also a powerful industrial base (*Saab* , the aerospace and nuclear sectors, and other industries [#WMD_equivalent](#)). Norway is a source of world-class financing. Denmark and Finland are very strong and reliable partners sharing high risks caused by turbulence in the U.S. and RF.
- **Diplomatic protection for the nuclear Jantelagen Shift** unites countries that are paragons of legality and pacifism: Stockholm acts as the speaker for the Northern fractal of free Europe – the Nordic-Baltic Eight (NB8) Coalition – frontline European countries facing the greatest risks generated by the U.S. relinquishing its rights to lead defense and investment in Europe according to its prerogatives acquired after WWII, the U.S. non-fulfillment of the Budapest Memorandum, U.S. plans for the annexation of Greenland and Canada hostile to Denmark and Britain, and trade blackmail of Europe.

SECTION 5: REVERSIBILITY and its condition – « Brother's Keepers »

The [#NordicNuclear](#) process **Autonomy** and other tracks of degradation of WMD non-proliferation and its non-use are still reversible.

Moreover, the extraordinary movement of the Jantelagen countries - paragons of peacekeeping and pacifism - towards their actual nuclear weapons could play a role in the Leverage US-PRC Synergy , stimulating their current leaders to find a stable and long-term formula. Very Big Deal between the US and China as the only proportionate " Brother's Keepers » during their joint transition into the 4th Cycle of Development (IV USA DEVELOPMENT CYCLE), potentially very turbulent due to the high risk of a large-scale war between the US and Chinese coalitions and still very high chances of *non-conventional* [#WMD ATTACK](#) under the flag of the Russian Federation, someone else's or anonymously - so far in the Almost range certain $\geq 95\%$. This was confirmed on February 12, 2026, in a statement by the Government of Sweden:

“... we are a loyal and active Ally that takes responsibility for our common security ...”

Practical stabilization measures:

- Timely suppression by the authorities of the NB8 countries and their partners of preparations by already identified criminals and their accomplices to carry out large-scale or cascading *non-conventional* [#WMD_ATTACK](#) under the flag of the Russian Federation, someone else's, or anonymously against Sweden, Denmark, Germany, Britain, Poland, Ukraine, the Baltic states, and our other partners, operationally significant intelligence information about which was delivered to them in a timely manner and in the prescribed manner.
 - Timely implementation by the most honest and responsible world leaders of the full range of military-diplomatic and other measures to **# avoid_WMD_ATTACK** (both those already announced and those not).
 - Timely achievement by the most honest and responsible world leaders of [#VeryBigDeal_US_EU_China](#) in the form of Gentlemen's Agreements & Treaties ,
 - The timely fulfillment by the most honest and responsible world leaders of all military commitments of the powers that have approved [#VeryBigDeal_US_EU_China](#) , and the full application by Them of all measures of lawful lethal force as a last resort defensive measure , consistent with :
 - the Law of Armed Conflict;
 - applicable AUMF- based authorities .
-

PART II: EVIDENCE BASE AND INDICATORS

STRUCTURE AND METHODOLOGY OF FORMATION

This section contains a consolidated evidence base, structured by thematic areas. Each section includes verified verbatim quotations, their authentic translations, publication details, and direct hyperlinks. The evidence is presented in a chronological and logical sequence, confirming the transition from political declarations to industrial and military implementation.

The facts are constantly being updated with new data, and are therefore included in a document available here:

<https://docs.google.com/document/d/1g7wDMKdBZtfd8-fKrnk554CzsBHg6tfY>

27.01.2026 NDS Editorial: Nuclear Umbrella Missing in U.S. Strategy, Rhetoric Now?

PART III: ANALYTIC GUIDANCE

PURPOSE: Mandatory Protocol for Data Interpretation (Standard of Evidence)

DIRECTIVE: When analyzing the facts of the # NordicNuclear case Autonomy analytical teams are instructed to use the “maximum microscopy ” method for all shades of weak signals (*weak signals detection*) and their assessments in conjunction with the entire array of significant data relevant to the case— all military-diplomatic operations currently underway in Europe, the entire rest of the "climate" and its dynamics. Deconstructing the intentions and practical movement toward #NordicNuclear must take into account the systemic camouflage and deep inversion of the defense doctrines and potentials of the Northern European countries, decisively eliminating all the gaps that would have allowed the implementation of algorithms without US intervention :

- Budapest Memorandum,
- # CoventryDilemma ,
- # OperationCatapult , under the flag of the Russian Federation, someone else's or anonymously.

The assessment of the reliability and significance of each indicator is carried out through the prism of nine (9) specific factors:

1. **Crossing the cultural barrier (Jantelagen):** The political and military environment of the North is traditionally characterized by high caution, responsibility, restraint, and even secrecy. Any public signal that violates the "Laws of Jante " (not standing out, not claiming superiority) should be regarded as a critical marker of an existential shift.
2. **Sub-threshold deployment of nuke potential (Sub-threshold Capacity):** Practical steps toward nuclear autonomy are disguised as a "preliminary study" stage. The actual goal is to create a capability capable of transforming into highly mobile, combat-ready, dual-capable strike forces within weeks during a threat period. Aircraft (DCA) as part of the Nordic military coalition Air Force with autonomous C2 chains, and own sovereign Nuke .
3. **Crisis of confidence in US intentions and capabilities (US Credibility Gap):** US plans to annex Greenland and Canada are real, as they required public assurances to the contrary from the Trump administration, but as all responsible European politicians know, not only from the Budapest Memorandum, US “assurances” are propaganda, Gaslighting Whitewashing decoy dummy and all other **PSYOP** and **MILDEC** tools. These and many other manifestations of the US crisis approaching the so-called " *edge " of a precipice* ", has already radically changed their policy (enshrined in the NSS and will continue as the so-called " *... not a tweak , but a regime*" **change** . ") as a reliable ally. The actions of the Northerners take into account these crisis convulsions of the United States' *desperate #USA_throes and the resulting risks to their sovereignty in defense. The degradation of European trust in US "declarations" is significantly exacerbated by the contrast with the " irrevocableness "* of all declared intentions and plans of China's foreign, military, economic, and monetary policies.
4. **Ambivalence and MILDEC:** The Application of Military Disinformation Techniques (*Military Deception*) allows you to mask the preparation of # NordicNuclear under "routine activity." Each individual step remains within the bounds of normality, but their synchronicity and cumulative effect confirm the decision to move toward #NordicNuclear and even the transition from planning to direct assignments to performers .
5. **Strategic leverage Construction):** The move toward nuclear status is an implicit (non-verbal) dialogue with the Washington elite and other actors . The goal is to create leverage to encourage them to participate honestly in #VeryBigDeal_US_EU_China and prevent scenarios similar to #CoventryDilemma and #OperationCatapult in Europe .
6. **Anomaly media background:** The current intensity and synchronicity of reports of "nuclear research" and

related cases are unprecedented not only in the North but throughout the region. Analysts should note the absence of similar surges in the entire period since 1968, when Sweden's military nuclear capabilities were curtailed. In particular, in Germany, Joschka Fischer, a staunch pacifist, is now effectively acting as an ideological battering ram for European nuclear weapons, alongside Chancellor Merz's confirmation of the start of preliminary consultations on "joint nuclear deterrence." Similar developments are also being observed in Poland.

7. **OPSEC/ InfoSec Priority :** Information about the actual activities of industry and the military in the nuclear sector is a top state secret. Any leakage of data into the public domain is either the result of an authorized leak (controlled pressure) or a sign of critical haste.
 8. **Existential character Drive):** The high pace of movement towards #NordicNuclear is justified by the real threat of genocide using *non-conventional* [#WMD ATTACK](#) under the flag of the Russian Federation, foreign or anonymous, is most acute for the Baltics and Finland.
 9. **Lack of verifiable refutations:** Since January 1, 2026, no refutations of the facts of the Northerners' movement towards nuclear autonomy have been recorded in the information space.
-

Inversion of Defense Doctrines and Potentials of Northern Europe

This is not a political fluctuation, but a **180-degree turn in the fundamental foundations of national identity**, defining the limits of the proportionate and the "unthinkable", the goals, methods and means of defense, one's own and that of the aggressors.

For the Nordic countries (especially Sweden and Finland in the last 70-200 years) this is a transition from the state of "Moral Superpowers" to Morgenthau's regional "nuclear realism" .

Components of inversion:

1. From "Nuclear Celibacy" to "Nuclear Sovereignty"

- **Before:** Sweden has historically been a leader in the global disarmament movement. In 1968, it voluntarily shut down its successful nuclear program, choosing to be a "moral example" of non-proliferation.
- **Became (Inversion):** Nuclear weapons continue to be perceived as "evil," but are seen as an acceptable, mathematically sound tool for preserving the biological and political existence of a nation.

2. The Collapse of "Strategic Parasitism"

- **Before:** For decades, Northern security was built on the tacit "parasitism" of American resources. It was believed that the US "umbrella" would open automatically due to Washington's authority to manage defense and investment in Europe, acquired after WWII .
- **Became (Inversion):** The recognition of the #OperationCatapult and #CoventryDilemma algorithms as real threats has led to the ally (USA) now being implicitly accepted as a more dangerous or unpredictable actor , whose convulsions are capable of causing **more** harm than an obvious enemy, which forces the Northerners to build an autonomous fortress.

3. Overcoming the " Jante Law " (Jantelagen) in the defense sector

- **Before:** The political culture of "keeping a low profile" and "being like everyone else." In defense terms, this meant moving "in the wake" of NATO defense doctrines or neutrality.
- **What has happened (Inversion):** Accepting the role of "**Diplomatic Battering Ram**" for a nuclear-free Europe. Sweden and the NB8 are beginning to lead the nuclear agenda for a nuclear-free Europe—even for Germany—declaring "realism" in understanding the projection of global threats onto the Arctic and Baltic regions. This is a transition from "modest neighbor " to "regional hegemon."

4. The transition of the entire industry, and then the nation, into #Military_civil_amalgamation

- **Before:** Strict separation of civil society and the military sector. Pride in " post-war " non-militarized development.
- **What has become (Inversion):** Total fusion and interpenetration. The entire infrastructure, industrial giants like *Saab* , nuclear energy, advanced civilian sectors like BigTech , and *GNR technologies* now objectively operate as a single complex. The inversion here is that the entire "peaceful" infrastructure and technological industries are now fused together as an amalgamation , which nonlinearly ensures the implementation of the principle of SECURITY FIRST .

5. From the "Bridge" of cousin convergence to containment "in all azimuths "

- **It was:** Northern Europe presented itself as a "bridge" of convergence and cooperation between "cousins" – the West and the East of European civilization.
- **What has become (Inversion):** The creation of its own autonomous center of power. The North is no longer a "layer" or a broker, but an independent player, ready to **recursively deter from all directions** (including protection from US "ally" encroachment on Greenland).

The essence of the revolution in doctrine: If previously the security of the North was a function of *international trust* , now it is becoming a function of *its own physical ability to inflict unacceptable damage* .

Nations that believed in the "end of history" and the fading of the Animus cycles *Nocendi* now find themselves facing the manifestation of **Parasitic Malice** previously thought of only by futurologists - a real threat of their genocide by embittered *Malitiosus* with the use of new generations of WMDD (disruption / destruction) and systems functionally equivalent thereto —# WMD_equivalent , therefore

Now all responsible nations, and not just the Northerners, are responsible for their proportionate defense against the Animus carriers. *Nocendi* - dummies of the proper state power (dummy # [SimulacrumPower](#)) , are forced, instead of *investing* in their infrastructure of knowledge, access and control #**dark_energy** , to once again spend their lives and all other limited resources on the development of the complexes of their antipodes — the industrial base for the serial production of components of the most lethal, mobile, stealthy WMD, autonomous military C2 chains of its use, and Nuke .

PART IV: Mission of the primary decision-making

By compelling responsible nations to divert critical resources toward Counter-WMDD and Nuclear Deterrence, the Malitiosus executes a direct—rather than incidental—'Strategic Evolutionary Drain'. Intelligence indicates that the Malitiosus is implementing a deliberate strategy to provoke a large-scale conflict between the United States and the People's Republic of China (PRC).

This scheme is designed to ensure that the Malitiosus alone extracts maximum gain by exponentially inflating the cost of its "services" to both belligerents.

The existence of binding Master-Documents, which mandate the specific plans, methods, and means to obstruct synergy between the U.S. and PRC, and to provoke a large-scale conflict between them, is documentarily established. The existence of these binding Master-Documents, which mandate the specific plans, methods, and means to obstruct synergy between the U.S. and PRC, and to provoke a large-scale conflict between them, is documentarily established.

This represents the definitive systemic signature of the Parasitic Malitiosus: a centuries-old modus operandi that derives profit from the stimulation of conflict and the active obstruction of integration and synergy beneficial to all responsible actors.

This executes Lenin's classic foreign policy doctrine of extracting #AntiSocialGain by fueling "inter-imperialist contradictions," thereby paralyzing global progress to secure the parasitic survival of the egoist alone.

This Leninist mandate—obliging the Parasitic Malitiosus to derive profit from the stimulation of conflict and the systematic obstruction of synergy—is further augmented by "pasconic" (parochial) and profane interpretations of Morgenthau's Realism and Waltz's Structuralism, coupled with an apologia for renegade-recidivism encapsulated in the defiant query:

"Am I my brother's keeper?"

As a logical consequence of this rejection of synergy, the "Parasitic Malitiosus" embodies the Confucian antithesis of the exemplary leader: «小人比而不周» (Xiǎo rén bǐ ér bù zhōu)—"The petty man forms cliques instead of seeking universality."

Such behavior inevitably triggers the corrective force of Hexagram 21, «噬嗑» (Shì kè, "Biting Through"), which mandates the application of legal sanctions and "Thunderous Punishment" (雷電) to eliminate obstructions to justice and restore systemic integrity - the proactive application of lawful lethal force applicable AUMF-based authorities.

At the critical juncture of the transition of the U.S. and PRC coalitions into the 4th Cycle of Development, the exhaustion of national assets—diverting critical resources toward Counter-WMDD and Nuclear Deterrence instead of the Mastery of Fundamental Forces, the extraction of Dark Energy, and Quantum Field Manipulation—represents more than a profound Evolutionary Opportunity Cost.

It constitutes direct and irreparable damage to the vital interests of the U.S., the PRC, and their responsible partners, including the UK, the EU, the Nordic Coalition, India, Turkey, Japan, and the State of Israel.

This is not a matter of 'Industrial Espionage', discrete sabotage, or kinetic diversions against isolated assets. Nor is it merely a series of trade war restrictions aimed at strangling specific economic sectors of the U.S., the PRC, and the EU—such as those dependent on semiconductors or rare-earth elements.

It is a substantial and unacceptable retardation—engineered through the provocation of large-scale conflict, or the imposition of an exhausting arms race and persistent brinkmanship—of a Critical Innovation Sowing Stage intended to dismantle physical and energetic barriers to a minimum-casualty transition into the 4th Cycle of Development (IV USA DEVELOPMENT CYCLE).

This transition, aligned with the Strauss-Howe 'Fourth Turning' (VI Cycle) and metaphorically enshrined in Brumidi's Apotheosis, represents the essential evolutionary threshold for the nation and the species.

Therefore, the mission of the primary decision-making centers of the U.S. and the PRC (alongside the UK, EU, the Nordic Coalition, and other responsible nations) directing their respective Intelligence and National Defense apparatuses, must transcend tactical monitoring.

The focus must shift toward the proactive application of lawful lethal force as a last-resort defensive measure, consistent with the Law of Armed Conflict and applicable AUMF-based authorities.

Such measures are imperative in the current climate of WMDD escalation to protect the vital Cognitive Infrastructure required for the Practical Harvesting of Dark Energy against the Parasitic Malice of #SimulacrumPower.

PART V: Statutory Definitions.

*[#AntiSocialGain](#): Any pecuniary or non-pecuniary benefit obtained through corruption or abuse of office, including Animus Nocendi of office, felony betrayal of public trust (malfeasance), or deliberate criminal misconduct in office causing substantial public harm.

This specifically includes the extraction of benefit from the deliberate pushing to the "edge of a precipice" through: Malicious Entrapment: The intentional engineering of military disarmament, downsizing, or the sabotage and containment of defense R&D advancement;

Strategic Underfunding: The systematic deprivation of resources from the defense sector against aggression, leading to insolvency, ruin, or existential debt.

It further encompasses self-interested obstruction of justice and the fully conscious violation or impairment of the lawful and priority duty to defend the state against military aggression or terrorism with minimal casualties. Such acts are committed with *dolus eventualis* approaching *dolus directus*—representing borderline intent or the functional equivalence of direct intent, established through conclusive conduct (*actus reus*) and manifested guilty mind (*mens rea*).

Aggravating Mental Elements:

Sadistic Gratification: The specific pleasure derived by the Malitiosus from victim suffering and from imminent or ongoing public harm (extreme malice);

Fear-Induced Career Self-Preservation: Where the official's fear for their professional standing induces a knowing failure to act, or an unlawful action, resulting in substantial public harm.

The Malitiosus: Subject of the "Malignant Heart"

The Malitiosus stands as the ultimate bearer of Animus Nocendi/Necandi (the intent to harm/the intent to kill). Unlike a common offender driven by mere gain or impulse, this subject acts with actual malice and a malignant heart.

In such cases, the infliction of harm, suffering, and death is not a byproduct, but the primary objective of the will (specific malevolence). This objective consists of emotional satisfaction or sadistic pleasure derived from the infliction, allowance, desperate throes, and death of victims, or from the witnessing of suffering, harm, and the deliberate abandonment of those in imminent peril.

By recognizing emotional gratification as a form of "personal interest", we can activate the full weight of Abuse of Office and Malfeasance statutes without changing existing laws—simply by updating the evidentiary practice of identifying gain.

Neutralizing the "Senselessness" Defense: An offender can no longer claim a lack of motive if their actions result in public harm or individual suffering; the demonstrated gratification (recorded via behavioral or reactive forensic analysis) becomes the corpus delicti of the gain.

The focus remains on the binary extraction of #AntiSocialGain:

1. Direct Sadistic Gratification from the mechanics of destruction;
2. Implementation of Subjective Hatred against a perceived collective identity.

These are the only two psychological assets that transform a standard misuse of power into a Parasitic Maliciousness requiring immediate proactive neutralization.

Evidentiary Note: Such antisocial gain may be established through retrospective forensic analysis of conclusive conduct, including documented physiological or behavioral manifestations of gratification (intonation, demeanor, and reactive patterns) exhibited during the commission of the harm or the refusal of aid.

Operational analysis mandates a strict Differentiation (Anger vs. Hatred):

Anger: Reactive, brief, and targeted at the removal of an obstacle. Anger is recognized as rational when it serves as an objective, justified response to the criminal actions of a Malitiosus, directed at the eradication or degradation of the Malitiosus itself. It is classified as professional deformation or as affective impulse only when it becomes excessive, unfounded, or disproportionate. Such impulses, being at times uncontrollable even for seasoned professionals, lead to the unlawful exceeding of authority and require observation and specialized correction.

Hatred: Strategic, stable, and aimed at the systemic eradication or degradation of an object. Hatred is inherently subjective, irrational, and pathological, functioning similarly to racism by driving the Malitiosus toward constant escalation and recidivism. It is this state of Hatred—coupled with a permanent or obsessive drive for Sadistic Gratification—that constitutes the primary source of Parasitic Malice.

"Spiritual wickedness in high places":

Where the use of force is lawful and consistent with mandate, yet accompanied by signs of 'pathological gratification', the response shall be strictly rehabilitative (Psychological Correction) rather than punitive.

However, for senior decision-makers (e.g., Director-level or Executive leadership), such deformation constitutes an existential risk—both to National Security and to the individual's own Personal Rectification, as allegorically enshrined in Brumidi's Apotheosis.

The addiction to the emotional reward of inflicting harm—even through lawful means—inevitably distorts strategic judgment, leading to the simulation of necessity for escalation. Therefore, rigorous psychological monitoring of the 'High-Level Human Infrastructure' is a mandatory preventive measure to thwart the emergence from within the legitimate apparatus of #SimulacrumPower.

[#ssuchivaniye](#)

The modus operandi for achieving the Apotheosis is the acquisition of Power through the elevation of the human mind and soul. This is attained not to "abolish the Law, but to fulfill it" for the common good of all who likewise seek its fulfillment, thereby establishing a definitive trajectory toward civilizational excellence.

As the ontological antithesis to the Apotheosis, the drive to "abolish the Law" through #ssuchivaniye serves as the primary modus operandi for ensuring the consolidation, synchronization, and cooperation of all strata within the hierarchy of #SimulacrumPower.

#SimulacrumPower effectuates the transformation of authority into a parasitic instrument of oppression against all who seek not to "abolish the Law, but to fulfill it."

This system demands a substantive and demonstrable complicity in Animus Nocendi as an absolute condition for participating in the misappropriation of societal wealth and the accumulation and control of vital forms of capital and its societally significant volumes.

In this inverted hierarchy, the Malitiosus does not merely rule; they invisibly and implicitly - "nevidimo" enforce a mandatory descent into #ssuchivaniye for all subordinates.

This ensures that the entire apparatus functions as a unified engine of Parasitic #AntiSocialGain, specifically engineered to maintain and expand its spatial control by stimulating the systemic degradation ("porcha") of individuals and nations through the deliberate corruption and inversion of the process of their Rectification, allegorically enshrined in Brumidi's Apotheosis.

In foreign policy, this is codified through the Leninist doctrine of fueling "inter-imperialist wars" and escalating global contradictions.

The Malitiosus extracts maximum gain by exponentially inflating the cost of its "services" to all belligerents, thereby paralyzing global Rectification to secure its own parasitic survival—even at the cost of orchestrating a catastrophic collision between the U.S.-led and PRC-led coalitions.

By maximizing their losses during the turbulent transition of these global alliances into the 4th Cycle of Development for the entire human species—the Strauss-Howe 'Fourth Turning'—the Malitiosus seeks to maximize its own gain.

Employing all its traditional methods and means—and strictly adhering to a documented and directive Master-Standard (Validated Reference Standard)—the Malitiosus acts to delay, restrain, and obstruct the achievement of timely and sustainable synergy between the U.S. and PRC coalitions during their transition

into the 4th Cycle of Development

(IV USA DEVELOPMENT CYCLE).

The existence of these binding Master-Documents, which mandate the specific plans, methods, and means to obstruct synergy between the U.S. and PRC, and to provoke a large-scale conflict between them, is documentarily established. The existence of these binding Master-Documents, which mandate the specific plans, methods, and means to obstruct synergy between the U.S. and PRC, and to provoke a large-scale conflict between them, is documentarily established.
