Overview and Objectives

One of the most exciting aspects of emLab is the innovative and impactful interdisciplinary research ideas that emerge from intellectual engagement and discussion among the emLab community. To foster and deepen the opportunities for these types of discussions, we are hosting a weekly roundtable for emLab Principal Investigators, Affiliates, Faculty Collaborators, and Postdoctoral Researchers this academic year to present, discuss, debate, and refine ideas and research questions.

Each meeting will be led by an emLab emLab Principal Investigators, Affiliates, Faculty Collaborators, or Postdoctoral Researchers on a topic of their choice and they will be responsible for leading the discussion. The goal of these sessions is to provide researchers a forum to present their research and to seek feedback from colleagues. The sessions can be used to talk about existing or new research ideas and/or leverage outside expertise to troubleshoot challenges and refine or develop new methodologies. There is no set format for this meeting - you can use slides, not use slides, it's up to you. You should provide background and context on whatever you are presenting and leave plenty of time for group discussion and engagement.

This will be a weekly standing meeting time on Thursdays at 12:30pm with people joining as they are available.

If you are interested in leading a discussion, please sign up for one of the dates above and specify your research topic - if no one signs up on a particular day, we will cancel the meeting on the Monday of that week.
