TechTeam Board Report
Monday, August 21, 2023

Sites
- School started, student devices and teacher laptops assigned and delivered
  - Working repairs and inventory to keep up with replacing broken devices
  - Chargers are the biggest challenge
- Continued installation of security cameras
  - Gun detection pilot failed but trying another one after 8/21
  - Emphasis on HS first
- Trying to catch up with disposition
- Phone system going well; working on custom call flows
  - Distributing phone app so users can use their cell phones as school phone
- Audio equipment in press box needs evaluation
  - Pixellot cameras still in use to broadcast games for those who cannot attend
- Challenges with online registration
  - Parents who pre-register are not finishing the forms
  - Parental access to contacts led to many inappropriate changes
  - Pre-registration for PreK led to many parents thinking they were getting in
  - Working with admin to plan out how to deal with issues before the end of the year

Erate / ECF
- Fiber Project update
  - Permits are in!!! WNM preparing to break ground and will get an update Tuesday
- Server Closet fix up
  - Working on erate funding to help consolidate and modernize networking closets
  - Not yet approved but working with Erate
  - Ardham technologies is the company that won the bid

Data / Powerschool
- STARS is officially gone (even though PED keeps using it to describe things)
  - Nova is in effect, and data is syncing with the state via EdFi
  - Corrections already underway so it should help streamline state reporting
  - Visions is NOT on EdFi so that may be the challenge for state reporting
- Assessment underway with MAPS, WIDA, and Istation
- Elevate Data Warehouse is finalizing assessment tools and data validation
  - 22-23 data is in, 21-22 is caught up with an issue that Powerschool is working on
  - We should be live with Elevate by the end of the month to start looking at data relationshipos
