ParentReply Privacy Policy

ParentReply does not collect, store, or share any user data. The extension processes text that the user voluntarily enters into the input field, but this data is not stored and not transmitted anywhere except to the OpenAI API for the sole purpose of generating a reply or summary. The extension does not access or read any emails, websites, or content automatically. It does not track user activity, browsing history, or identify any individuals.

All settings saved locally (such as tone preference or reply length) remain on the user's device and do not leave the browser.

ParentReply does not sell or transfer user data to third parties and does not use any data outside of its explicit purpose.
