TOMORROW’S LEADERS START HERE

Did you know that youth in Scouting America say Scouting helps them be more honest, improves their ability to work with others, helps them become stronger team players and better understand and sympathize with those less fortunate?

Scouting provides an in-person, active, program that is a safe place for young men and women to explore on their own, build confidence and become the best versions of themselves. It’s not something we do for them. It’s something they do for themselves. We help provide the tools they can use to be the most successful along the way. We help them to be prepared.

Scouts BSA is the Scouting experience for 6th, 7th, and 8th graders at {Name of School} where boys and girls get out in the local wilderness, develop a love of service by volunteering in the community, boost leadership skills through fun and exciting challenges, and create memories of a lifetime. No prior Scouting experience required.

It’s not just the youth who benefit from Scouting. It truly for the whole family. More time together hiking, exploring, and being involved in the community means you get to be a part of your child’s path of adventure as they grow into ethical leaders. And the best part? It’s tons of fun.

Learn more about your child opportunity to be a Scout by {insert contact information or invite to an event/meeting}.

For over a century, the mission of Scouting America has been to prepare young people to make ethical and moral choices over their lifetimes by instilling in them the values of the Scout Oath and Law. www.montanacouncil.org
