

How to Identify the physical location of an Oracle Block?

Identify blocks and its physical location for all rows in a table.

```
set linesize 200
set pagesize 200
set pause on
col name format a35

select
    row_id,
    --rowid_type,
    name,
    block#,
    object_id,
    datafileID,
    empno,
    ename,
    sal,
    deptno
from
    (SELECT rowid ROW_ID,
    dbms_rowid.rowid_type(rowid) as rowID_Type,
    dbms_rowid.rowid_block_number(rowid) as block#,
    dbms_rowid.rowid_object(rowid) as object_ID,
    dbms_rowid.rowid_relative_fno(rowid) as DataFileID,
    rownum,
    empno,
    ename,
    sal,
    deptno
     from scott.emp a), V$datafile b
where
    datafileID=b.file#
order by
    block#;
```

ROW_ID	NAME	BLOCK#	OBJECT_ID	DATAFILEID	EMPNO	ENAME	SAL	DEPTNO

17 rows selected.

Identify a block for a particular row (or set of rows based on “where” condition)

select

```
row_id,
--rowid_type,
name,
block#,
object_id,
datafileID,
empno,
ename,
sal,
deptno
```

from

(SELECT

```
rowid ROW_ID,
dbms_rowid.rowid_type(rowid) as rowID_Type,
dbms_rowid.rowid_block_number(rowid) as block#,
dbms_rowid.rowid_object(rowid) as object_ID,
dbms_rowid.rowid_relative_fno(rowid) as DataFileID,
rownum,
empno,
ename,
sal,
```

```

deptno
from
  scott.emp a
where
  ename='KING'), V$datafile b
where
  datafileID=b.file#;
```

ROW_ID	NAME	BLOCK#	OBJECT_ID	DATAFILEID	EMPNO	ENAME	SAL	DEPTNO
