

## App Development

- **Compare child's word development against the norm**
  - Implement data analytics to show percentile comparisons for child speech milestones.
  - Finalize the word comparison logic against age-based linguistic norms.
- **Fix parent sharing**
  - Debug and finalize child sharing feature between multiple parent accounts.
- **Build and deploy app to TestFlight**
  - Push signed internal build to Apple TestFlight for testing on real hardware.

## Website & Frontend

- **In-app onboarding form**
  - Replace the broken external Qualtrics survey with an internal demographic intake form.
  - Ensure onboarding form properly captures demographics prior to full account access.
- **Update CSV download**
  - Modify the CSV export script to include new data points from the internal survey.

## Backend & Testing

- **Testing suite with Playwright**
  - Implement automated end-to-end testing using the Playwright framework.

## Documentation

- **Handoff Documentation**
  - Deployment guide: Document TestFlight and build processes.
  - Development guide: Document the Android and CSV export logic.
  - User guide: Finalize instructions for the mobile and web portals.
  - FAQ: Address common parent questions regarding word logging and sharing.
  - Testing plan: Outline the coverage provided by the Playwright suite.

## Sprint Chores & QA (New Additions)

- **Code Review:** Final review of all pull requests before project handoff.
- **Bug Triage:** Resolve high-priority bugs discovered during TestFlight testing.
- **Cybersecurity:** Fix the security issues as recommended by our cyber team.
