

If you set printing preferences this will change what happens when you print your document. If this button is enabled, any changes you make while printing (for example, switching from 2-sided to 1-sided printing) are saved as your new default printing preferences.

This means those settings will apply to all future print jobs, not just the current one.

To avoid changing your default print If this button is enabled, any changes made to your printing settings during a print job (e.g., switching from 2-sided to 1-sided printing) will be saved as your new default printing preferences.

These new settings will then apply to all subsequent print jobs, not just the current one.

To prevent unintentionally changing your default print settings...
