Data Visualization Network

Overview of the Network/Learning Outcomes

The Data Visualization Network is an exciting opportunity for county office and district leaders to come together and learn about cutting edge, effective data visualization. Participation will build your capacity to effectively communicate your local context via data.

The focus for the learning will be Stephanie Evergreen's online Data Visualization Academy, the cost of which will be covered by Sonoma County Office of Education. The nine network meetings will be devoted to sharing our work, learning from each other, and building our community of data focused educators.
This yearlong network will prepare participants to:
- Understand the foundations and research behind effective data visualization
- Create visualizations using Excel, R-Code, or Tableau
- Determine which visualization will most effectively communicate student needs and spark conversation to take action
- Learn with and from a cohort of data focused educators from other county offices and districts

Network Expectations
- Attendance at all network meetings
- Completion of two agreed upon tutorials during each action period
- Application of at least one tutorial with your local data during each action period
- Willingness to share your visualization(s) and receive feedback
- Willingness to support the learning of others and create a vibrant learning community
- Willingness to share application/analysis of visualization in the field

Network Schedule

Currently, all meetings are held via zoom from 1:30-3:30. Meetings may transition to in person meetings as conditions allow.

March 10, 2021
April 21, 2021
June 16, 2021
August 4, 2021
September 22, 2021
November 3, 2021
December 15, 2021
January 19, 2022
February 23, 2022

Submission of Interest

The network will be limited to twenty participants. Please indicate your interest in and agreement to participate in this network by filling out this submission of interest by February 26th. If you have any questions, please contact Lyndsey Munn at lmunn@scoe.org.
