

Dr. Ronald Gonzo, the director of a local university, State Tech, wants to use a standardized personality test to help find the best candidates for new teachers. Based on our in-class activity, prepare a report that answers the following questions:

1. What kind of personality test should be used? Why?
2. Based on the results of the “color test”, which candidates are the most suitable for work as teachers? Why?

Remember: you should follow the conventions of report writing for a formal audience. Your response should be between 230 and 270 words.

***Bonus Requirement:** use three new vocabulary words from our vocabulary quizzes this semester. Be sure to underline and **highlight** these words!
